High Speed 2 Port Valve

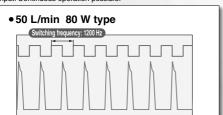

Long service life: 5 billion cycles or more

SMC's original valve and coil structure realizes a longer product life and requires less maintenance frequency.

(50 L/min type, 24 VDC, 0.25 MPa. Based on SMC life test conditions.)

High frequency: 1200 Hz

Good followability and response to successive electrical signal input. Continuous operation possible.

Low power consumption: 4 W Continuous energization for extended periods is possible.

2 mounting types

Quick disconnect type

Screw mount type

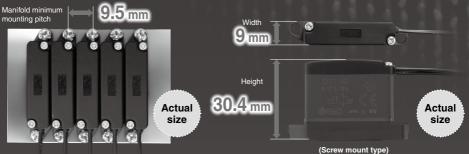

The manifold base should be prepared by users.

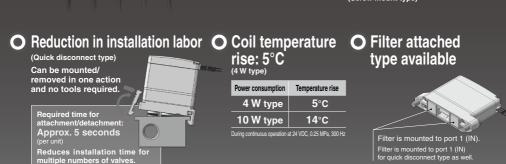

INDEX

Series SX10

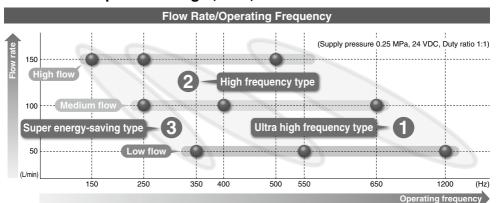

○ Compact and Space-saving * The manifold base should be prepared by users.

Variations/Purpose of Usage (Guide)

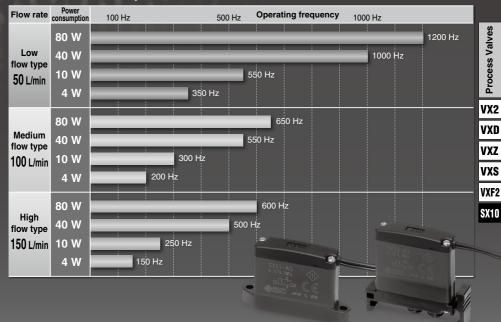

Specifications	Driver	Continuous	Power	OFF response time			
Specifications	Driver	energization	consumption	50 L/min	100 L/min	150 L/min	
Ultra high frequency type 500 to 1200 Hz For power saving driver (Refer to page 816.)		_	80 W, 40 W	0.4 ms	0.55 ms	0.75 ms	
2 High frequency type 250 to 550 Hz	ligh frequency type 250 to 550 Hz Control driver is not necessary.		10 W	0.4 ms	0.55 ms	0.75 ms	
Super energy-saving type 150 to 350 Hz Control driver is not necessary.		Possible	4 W	0.4 ms	0.55 ms	0.75 ms	

(Note) Please consult with SMC for continuous energization.

All models have the same body size.

Select a model according to applications and purposes.

High speed response required for both ON and OFF

Select the 80 W or 40 W type.

Model	Power	Flow rate	Max. operating	Response time (ms)			
Model	consumption	riow rate	frequency	ON	OFF		
SX1□-A	80 W	50 L/min	1200 Hz	0.45	0.4		
-В	40 W	50 L/min	1000 Hz	0.55	0.4		
-Е	80 W	100 L/min	650 Hz	0.55	0.55		
-F	40 W	100 L/min	550 Hz	0.7	0.55		
-J	80 W	150 L/min	600 Hz	0.6	0.75		
-K	40 W	150 L/min	500 Hz	0.8	0.75		

* Current needs to be limited.

High speed response required for OFF only without use of special control circuit

Select the 10 W type.

Model	Power	Flow rate	Max. operating	Response time (ms)			
	consumption	riow rate	frequency	ON	OFF		
SX1□-C	10 W	50 L/min	550 Hz	0.9	0.4		
-G	10 W	100 L/min	300 Hz	1.1	0.55		
-L	10 W	150 L/min	250 Hz	1.35	0.75		

* Please consult with SMC for continuous energization.

Saving energy and continuous energization required	Select the 4 W type.
_	

Model	Power	Flow rate	Max. operating	Response time (ms)			
	consumption	riow rate	frequency	ON	OFF		
SX1□-D	4 W	50 L/min	350 Hz	1.25	0.4		
-H	4 W	100 L/min	200 Hz	1.7	0.55		
-М	4 W	150 L/min	150 Hz	2.75	0.75		

* Continuous energization is possible.

High Speed 2 Port Valve

Series SX10

How to Order

SX12F-AG

Valve mounting

Screw mount type Note)
 Quick disconnect type

Note) Two mounting screws (M3 x 0.5) and a gasket are included. (packaged together)

Filter (IN port)

Nil	Without filter								
F	With filter Note)								
Note) Flow reduction rate									
5	0 L/min: 5% or les								

50 L/min: 5% or less 100 L/min: 5 to 10% 150 L/min: 10 to 15%

Flow rate/Operating frequency (at 24 VDC, 0.25 MPa)

		medianie, (m.	,
Symbol	Flow rate (L/min)	Power consumption (W)	Max. operating frequency (Hz
Α		80	1200
В	50	40	1000
С		10	550
D		4	350
E	100	80	650
F		40	550
G		10	300
Н		4	200
J		80	600
K	150	40	500
L	130	10	250
M		4	150

■ Lead wire (grommet) length

Symbol	Length
G	300 mm
Н	500 mm
J	1000 mm

Specifications

Note 1) 24 VDC, Duty ratio 1:1

- 80 W: Current needs to be limited by using an energy saving driver circuit.
- 40 W: Current needs to be limited by using an energy saving driver circuit.
- 10 W: Energizing time is one second at a maximum. Please consult with SMC for continuous energization.

4 W: Continuous energization is possible.

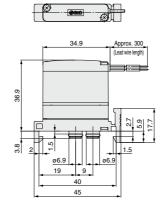

Note 2) The response time and maximum operating frequency are not guaranteed. (Actual values based on SMC test conditions)

⚠ Specific Product Precautions

Be sure to read before handling. Refer to page 1154 for Safety Instructions. For 2 Port Solenoid Valves for Fluid Control Precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on SMC website, http://www.smcworld.com

Continuous Energization (at 24 VDC)

⚠ Caution

1. Power consumption 80 W type: Not available

40 W type: 4 to 8 VDC 10 W type: 8 to 16 VDC

When operating with an energy saving driver, continuous energization with the holding voltage of 3 to 6 VDC is possible.

2. Power consumption 40 W type: Not available

When operating with an energy saving driver, continuous energization with the holding voltage of 4 to 8 VDC is possible.

3. Power consumption 10 W type: Please consult with SMC.

When operating with an energy saving driver, continuous energization with the holding voltage of 8 to 16 VDC is possible.

4. Power consumption 4 W type: Available

Energized Time/Non-energized Time (When not using power saving driver)

↑ Caution

- Non-energized time (OFF) must be set longer than the energized time (ON).
- For use with voltages other than 24 VDC, please consult with SMC with the operating condition information of pressure, voltage, energized time and non-energized time.

Others

- If the valve is energized without air supply, the coil may be burned. Make sure to supply pressure to the valve when energizing.
- Please contact SMC for the product usage with a voltage at 75 VDC or more. Standard required by CE mark is different.
