New OPC UA^{*1}

^{*1} PROFINET only

Made to order

ETHERNET POWERLINK

CC-Link IE Field

IO-Link unit compatible SI unit

EtherNet/IP

EtherCAT

IO-Link unit

- 2 models (port class A and port class B)
- Diagnostic is possible from the upper level communication.
- The data can be accessed from via PC (setting tool).
- Device parameter setting function, Automatic saving/writing

Self-diagnostic function

Equipped with an input/output open/short-circuit detection function and an input/output signal ON/OFF counter function

Web server function^{*1}

Status checks and forced output are possible via web browser.

Various connectors available

The following connectors are selectable for the input/output devices: M12 connectors, M8 connectors, D-sub connectors, and spring type terminal blocks.

Up to 9 units^{*1} can be connected.

Up to 9 units can be connected in any order.

^{*1} Excludes SI units

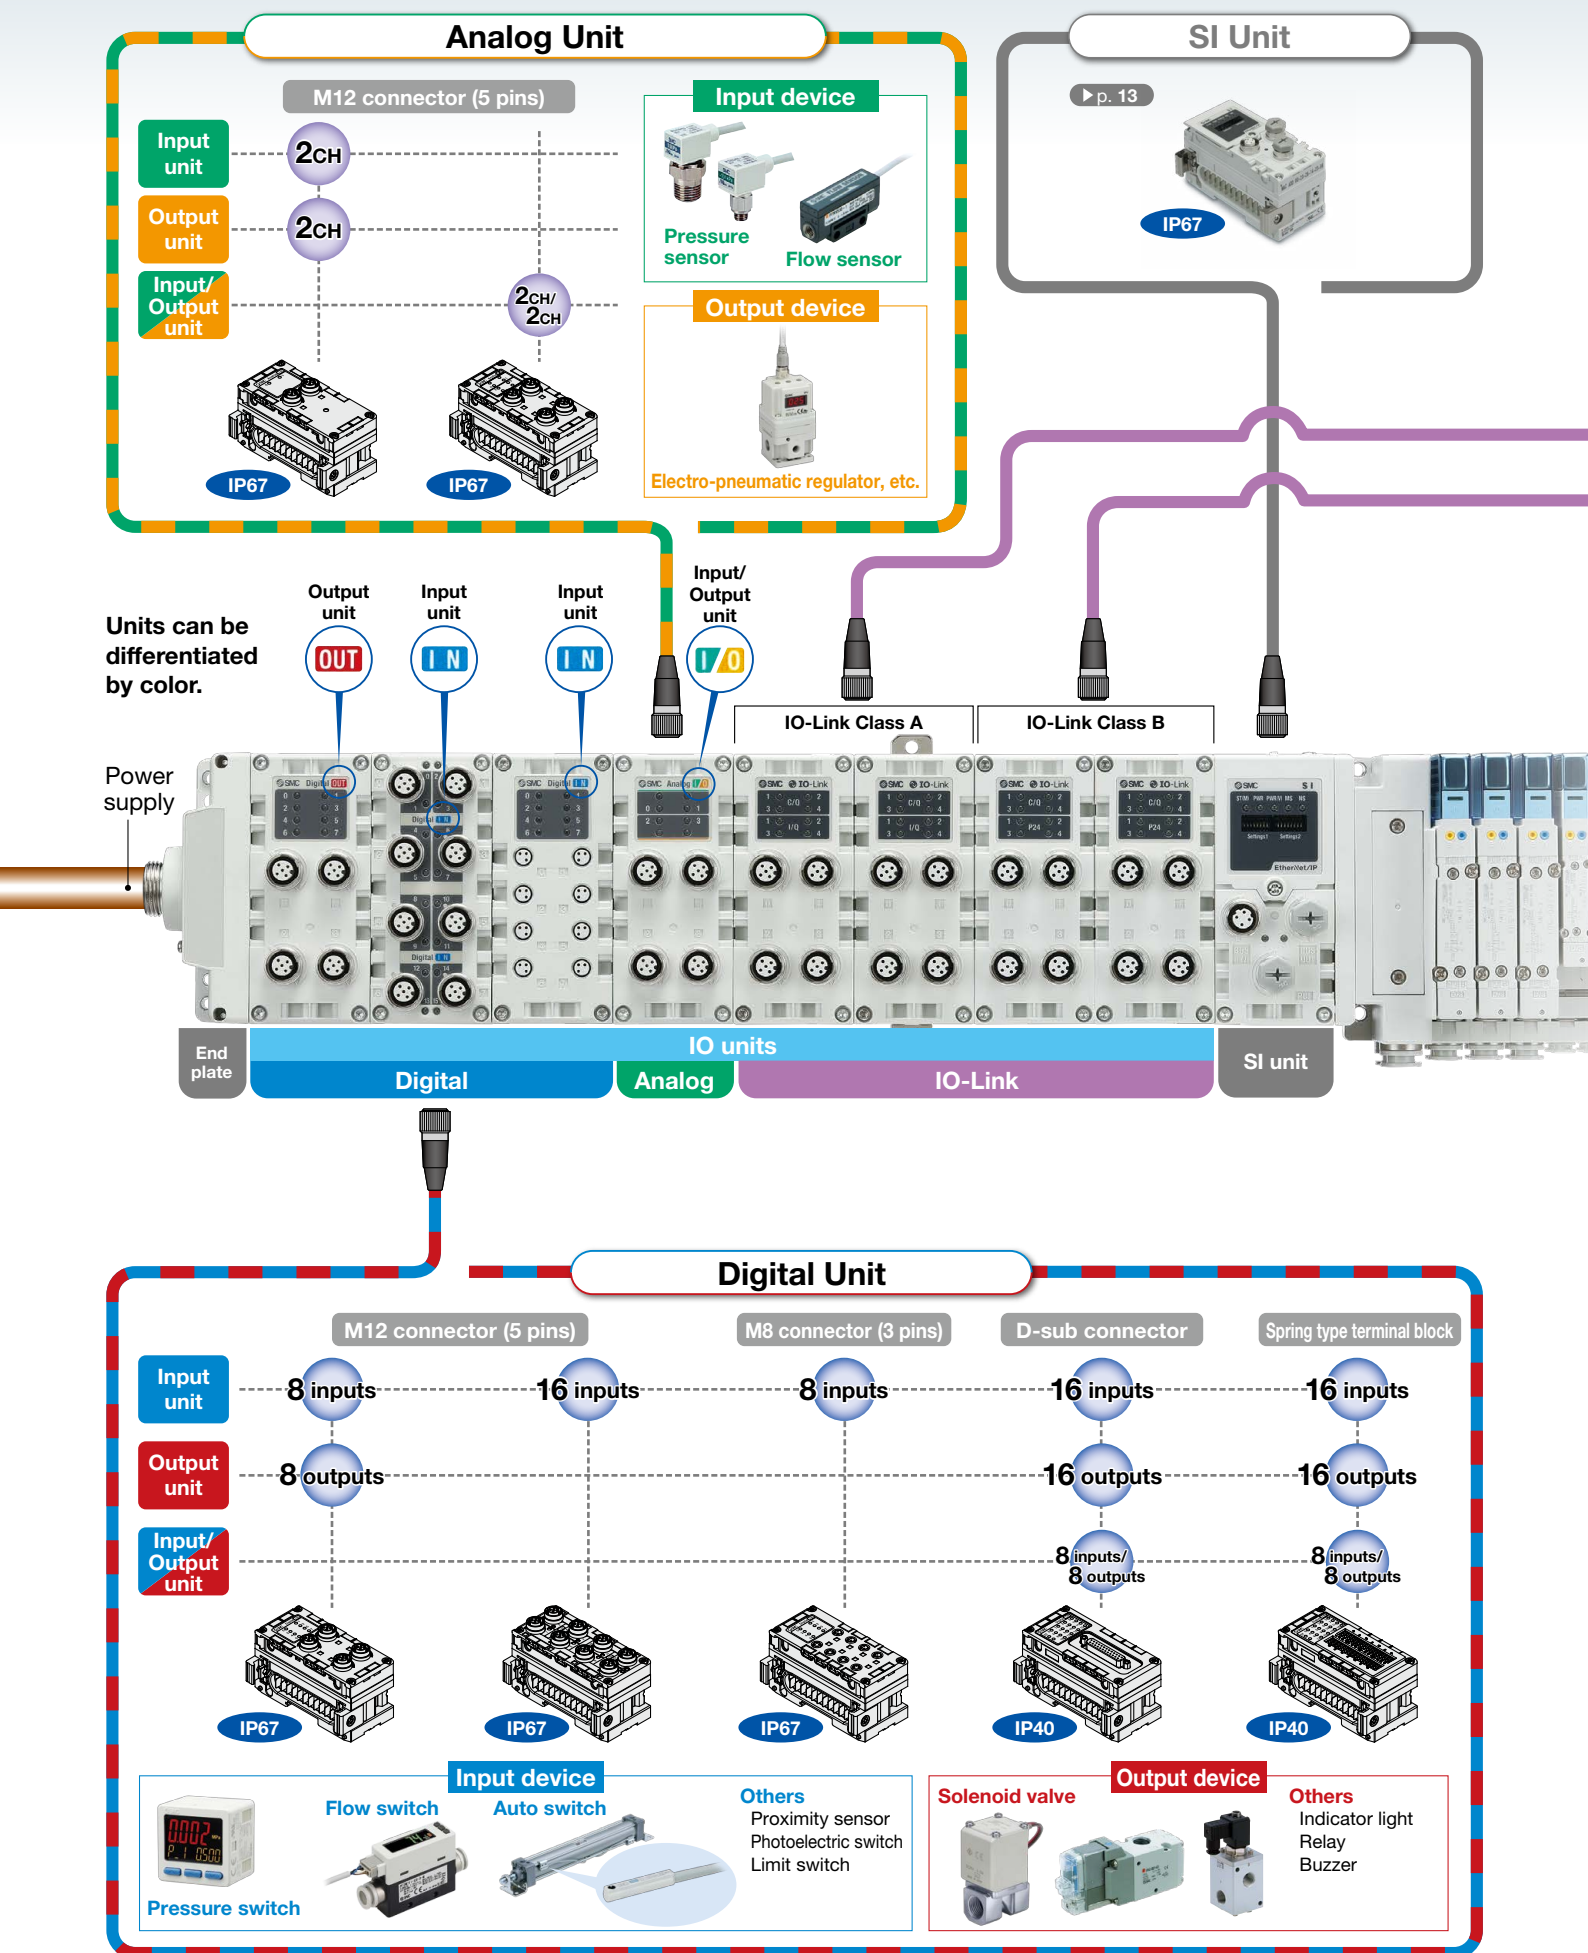

EX600 Series

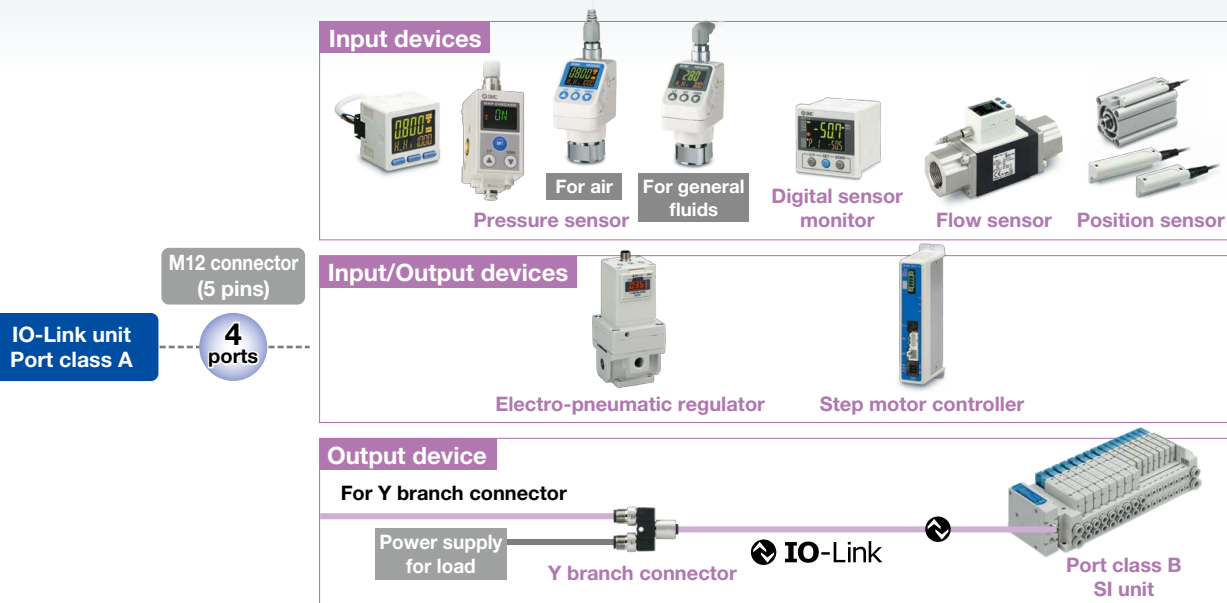

CAT.E02-24H

Can be connected with digital, analog, and IO-Link units

IO-Link Unit / Port Class A Devices

New IO-Link Terminal Unit (IO-Link Device)

IO-Link Unit / Port Class B Device

IO-Link

IO-Link is a communication technology for sensors and actuators that is an international standard, IEC 61131-9.

This technology is used to send/receive device information such as manufacturer, product part number, parameters, and diagnostic data, as well as the control data including ON/OFF signals and measured values of the sensor, by connecting the IO-Link master and device in a 1:1 configuration.

IO-Link enables condition monitoring and error detection of the sensor and equipment, and it can contribute to the reduction of startup labor and recovery time and the realization of preventive and predictive maintenance.

Reduced design and startup labor

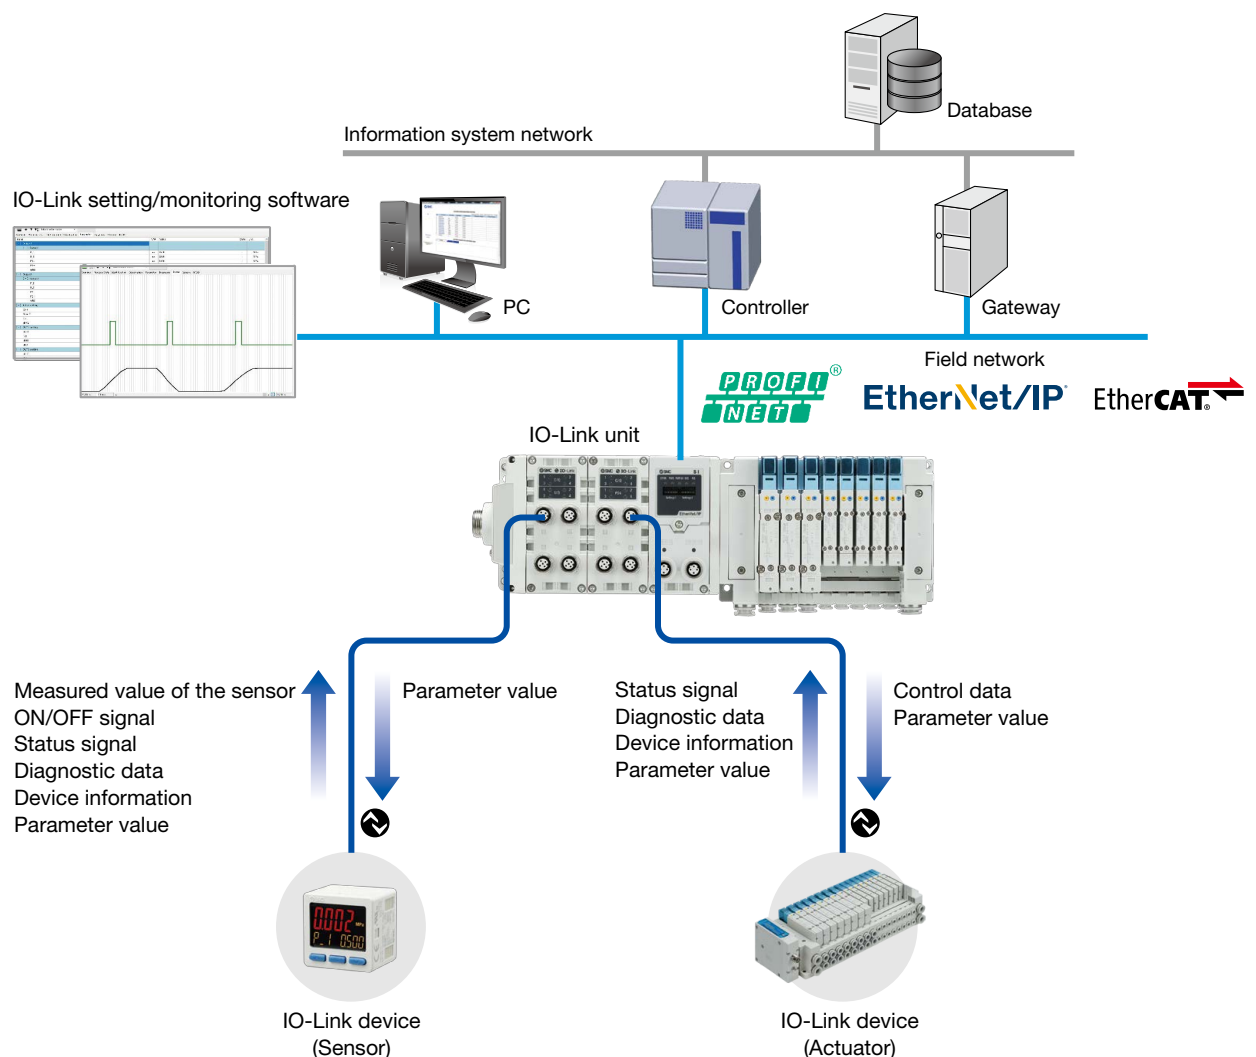

- Batch setting of device parameters from the upper level
- Remote check of device information
- Detection and remote unified check of device misconnection/non-connection

Minimum recovery time due to error detection

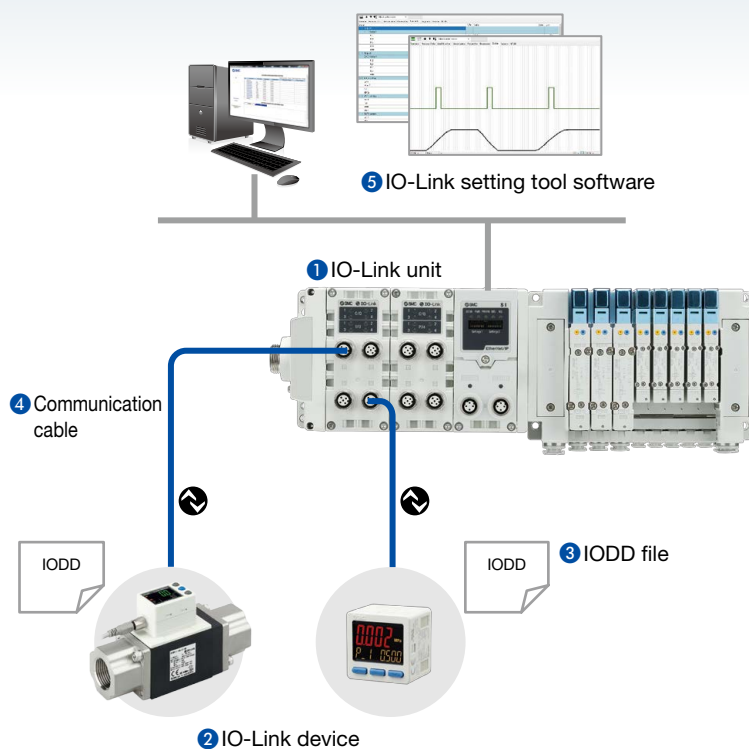

- Early detection of location where problem is occurring via communication
- Early obtaining of information on problem phenomenon via communication
- Early recovery during product replacement (automatic setting of device parameters)

Preventive and predictive maintenance through condition monitoring

- Monitors changes in measured values of a sensor during signal ON/OFF
- Monitors the number of device operations and automatically notifies when the set number of operations has been exceeded
- Remote monitoring of device and equipment conditions via communication

IO-Link System Configuration

1 IO-Link unit

- Acts as a gateway between the IO-Link communication and the upper level communication

2 IO-Link device

- A sensor/actuator connecting to each port of the IO-Link unit in a 1:1 configuration

3 IODD file

- A file in which device properties and parameters are described
- Registered to the setting tool
- Provided by the device manufacturer

4 Communication cable

- A 4-wire or 5-wire general-purpose cable that is the same as the existing sensor cable (Unshielded cable)
- Max. cable length: 20 m

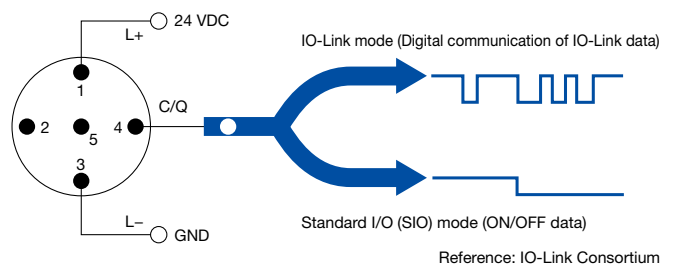

5 IO-Link setting tool (IO-Link Device Tool)

- Software for the setting and monitoring of an IO-Link unit/device

*1 A setting tool compatible with the IO-Link units of every manufacturer is used for the SMC EX600 series IO-Link unit. (IO-Link Device Tool V5-PE (V5 or later only) manufactured by TMG Technologie und Engineering GmbH (hereinafter referred to as TMG))

IO-Link Interface

The connecting part between the IO-Link unit and the device is called a “port.” Each port can be switched between “IO-Link mode” for digital communication and “standard I/O mode” for conventional contact input/output.

2 types of interfaces

There are two methods for power supply: one is for sensors, and the other is for actuators.

The control power supply wire and signal wire can be connected with one cable. (Mainly for sensors)

The control power supply wire, external power supply wire, and signal wire can be connected with one cable. (Mainly for actuators)

IO-Link Unit

Can be connected with digital, analog, and IO-Link unit units

Up to **9** IO-Link units can be connected. (36 IO-Link devices can be connected.)

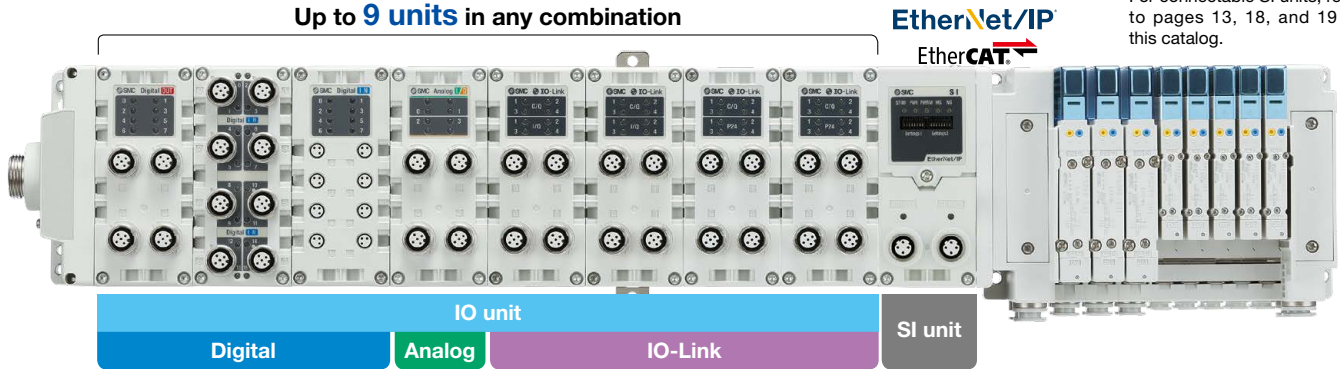

Digital units, analog units, and IO-Link units can be mixed, and up to 9 units can be connected in any order.

4 IO-Link devices can be connected.

[Connectable SI unit]

PROFINET
EtherNet/IP
EtherCAT

* For connectable SI units, refer to pages 13, 18, and 19 of this catalog.

Supports both port class A and port class B

The data can be accessed from via PC (IO-Link setting tool).

Setting screen

Unit No.	Unit Name	Unit Type	Unit Parameters
1	IO-Link Unit	IO-Link	...
2	IO-Link Unit	IO-Link	...
3	IO-Link Unit	IO-Link	...
4	IO-Link Unit	IO-Link	...

Monitoring screen

IO-Link units and IO-Link devices can be set and monitored from a PC without going through a PLC.

- Process data
- Unit parameters, Device parameters
- Unit information, Device information
- Port diagnostic, Device diagnostic

* The IO-Link setting tool is TMG's IO-Link Device Tool.

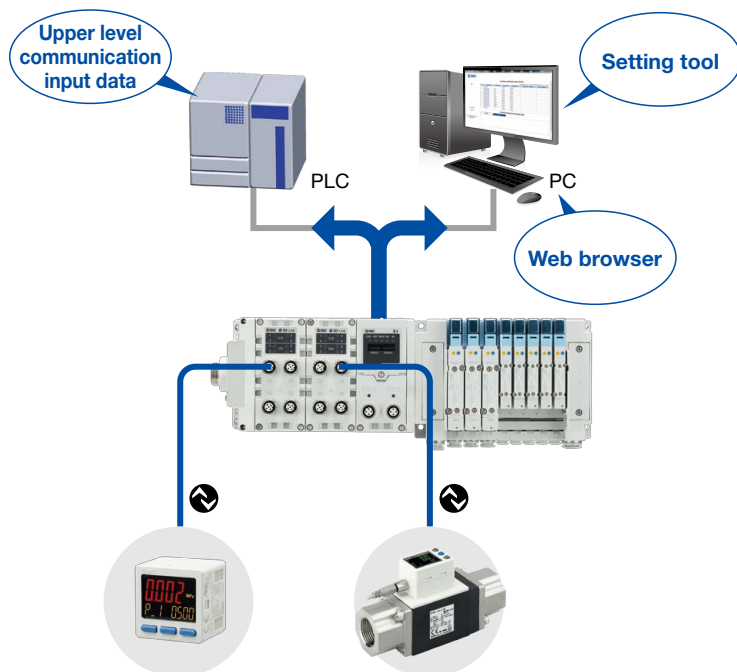

It can be downloaded for free from TMG's website. However, to use it for more than 30 days, a license key for the IO-Link Device Tool is required. (Refer to page 49 for details.)

Diagnostic function

Diagnostic is possible from the upper level communication.

IO-Link unit (port) diagnostic information can be obtained via PLC program or PC (web browser).

Device diagnostic information can be obtained via PC (setting tool).

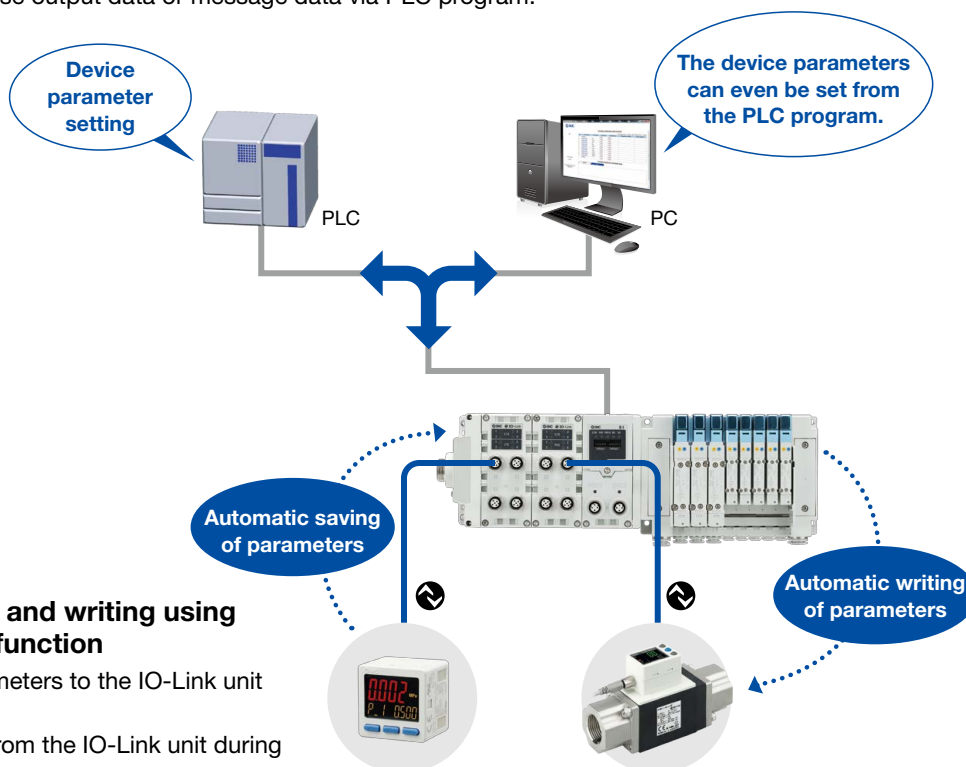

Items of IO-Link unit (port) diagnostic
Detection of port short-circuit
Detection of non-connected device
Detection of misconnected device (check error)
Notification of port misconfiguration (excessively large input/output data)
Conditions of diagnostic event (port, device)
Items of device diagnostic
Diagnostic results (problem phenomenon) received from devices are shown in event codes.

Device parameter setting function, Automatic saving/writing

The parameter setting of devices is possible from the upper level communication.

Parameter setting is possible via PC (setting tool).

It is also possible to use output data or message data via PLC program.

Automatic saving and writing using the data storage function

- Saves device parameters to the IO-Link unit automatically
- Automatic writing from the IO-Link unit during device replacement

Fieldbus System EX600

New Separate installation possible via a terminal unit

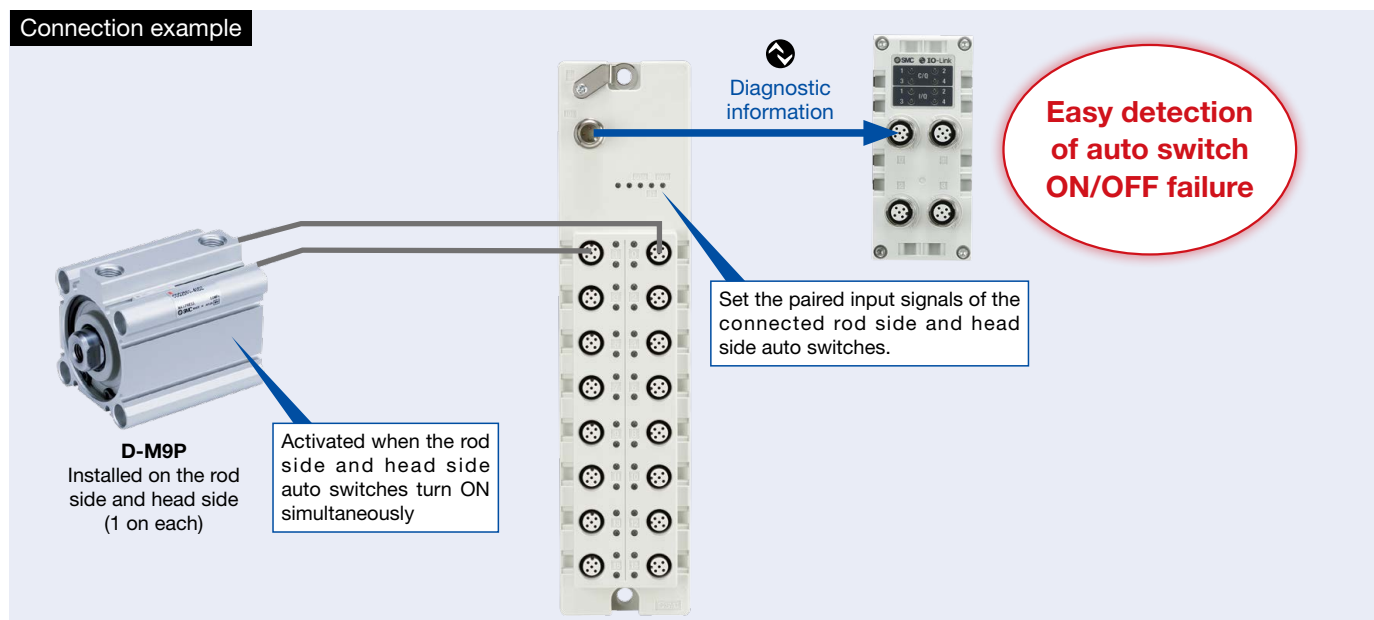

By using a terminal unit, it is possible to install input devices such as auto switches separately from the valve manifold.

Auto switch failure diagnostic function

By setting the paired input signals of the auto switches mounted on the cylinder to the terminal unit, auto switch failure diagnostics (notification when both auto switches turn ON or OFF simultaneously) is possible. Refer to the connection examples in the “Accessories” section on page 48.

Connection example

* The auto switch failure diagnostic function is a function built into the terminal unit. It can also be used with IO-Link masters manufactured by other companies.

Fieldbus System EX600

D-sub connector

IP40

These units are capable of connection using a D-sub connector. There are three types of units: for digital input, output, and input/output. The digital output unit can be connected with an SMC manifold solenoid valve F kit (D-sub connector).

Manifold solenoid valves/Vacuum unit can be connected using a cable with a D-sub connector.

- SY series • S0700 series • SJ series • SQ series
- SV series • VQC series • VQ series • JSY series
- ZK2□A series

* Please limit the number of valve connections to 16 stations for single and 8 stations for double. Refer to the catalog of each product for pin assignment details.

VVZS3000-21A-□-X192 (Non-waterproof cable example)

Spring type terminal block

IP40

These terminal block units are compatible with individual wiring configurations. There are three types of units: for digital input, output, and input/output. Wiring connection to a sensor connector box, etc., can be carried out easily using only a flat head screwdriver.

Digital input unit

IP67

This unit is for inputting a digital signal (ON/OFF signal). The signal of a 2-wire/3-wire auto switch attached to the actuator can be acquired to feedback a signal to the PLC. The control signal of an entire system can be managed by a Fieldbus system.

Analog input/output unit

IP67

These units are for inputting or outputting an analog signal (voltage/current). A single unit performs both input and output, allowing feedback control where analog signals are received from a pressure sensor and sent to a pressure controller. Installation space is minimized as well.

EtherNet Fieldbus Functions

PROFINET (EX600-SPN3/4/31), EtherNet/IP™ (EX600-SEN7/8), and EtherCAT (EX600-SEC3/4) support the following functions.

Compatible topologies (Connection configuration)

The EX600-SEN7/8, EX600-SPN3/4/31, and EX600-SEC3/4 support **star, linear, and ring** network topologies.

Linear type

Ring type

For ring networks, communication can be continued even if one of the communication cables in the network is disconnected or damaged. As the EX600-SEN7/8 supports Device Level Ring (DLR), and the EX600-SPN3/4/31 supports Media Redundancy Protocol (MRP), the disconnected point can be identified.

* In order to use DLR or MRP, the PLC must be able to support it.

Normal flow of data

Data flow when the communication cable is disconnected

■ Supports the QuickConnect™ function and the Fast Start Up function

Time from power ON
to communication connection

10 s

Approx.
0.5 s

In the case of a tool changer, it takes about 10 seconds for communication to be connected in some products after the power to the device installed on the tool is turned ON.

The EX600-SEN7/8 supports the QuickConnect™ function, and the EX600-SPN3/4 supports the Fast Start Up function, which enables communication connection in only approx. 0.5 s.

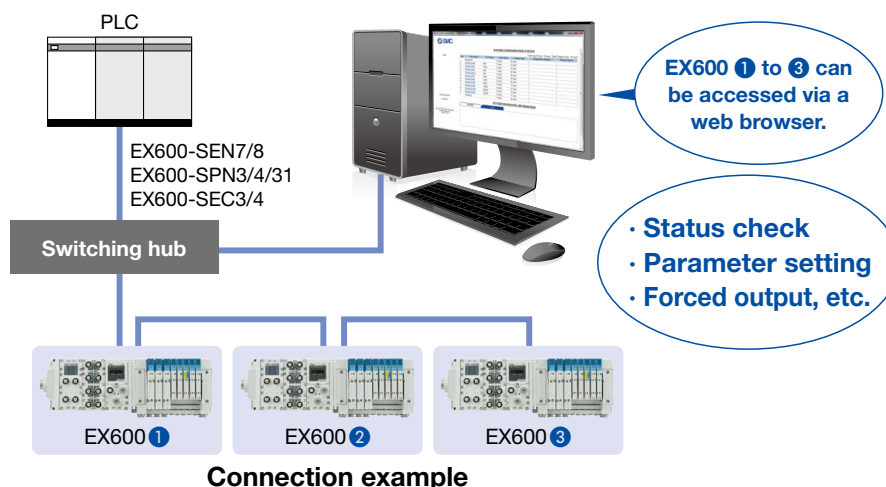

* In order to use the QuickConnect™ function or the Fast Start Up function, the PLC must be able to support it.

■ Built-in web server function

The EX600-SEN7/8, EX600-SPN3/4/31, and EX600-SEC3/4 have a built-in web server function, which enables status checks, parameter settings (EX600-SEN7/8 and EX600-SEC3/4), and forced output of the EX600 using general-purpose web browsers, such as Google Chrome.

Start-up of the system and maintenance can be performed efficiently.

PROFINET Technology

■ System Redundancy S2

As the EX600-SPN3/4/31 supports System Redundancy S2, it can continue communication using the backup controller when the primary controller malfunctions. This allows for the prevention of problems caused by unexpected communication interruption.

* In order to use System Redundancy S2, the PLC must be able to support this function.

EX600-SPN31 PROFINET/OPC UA

OPC UA server function

As the data communication protocol OPC UA is platform independent, it can be used to improve efficiency and visualization onsite by transmitting operating status, diagnostic information, etc. It can also communicate with devices using other Fieldbus protocols.

Various production equipment status visualization methods

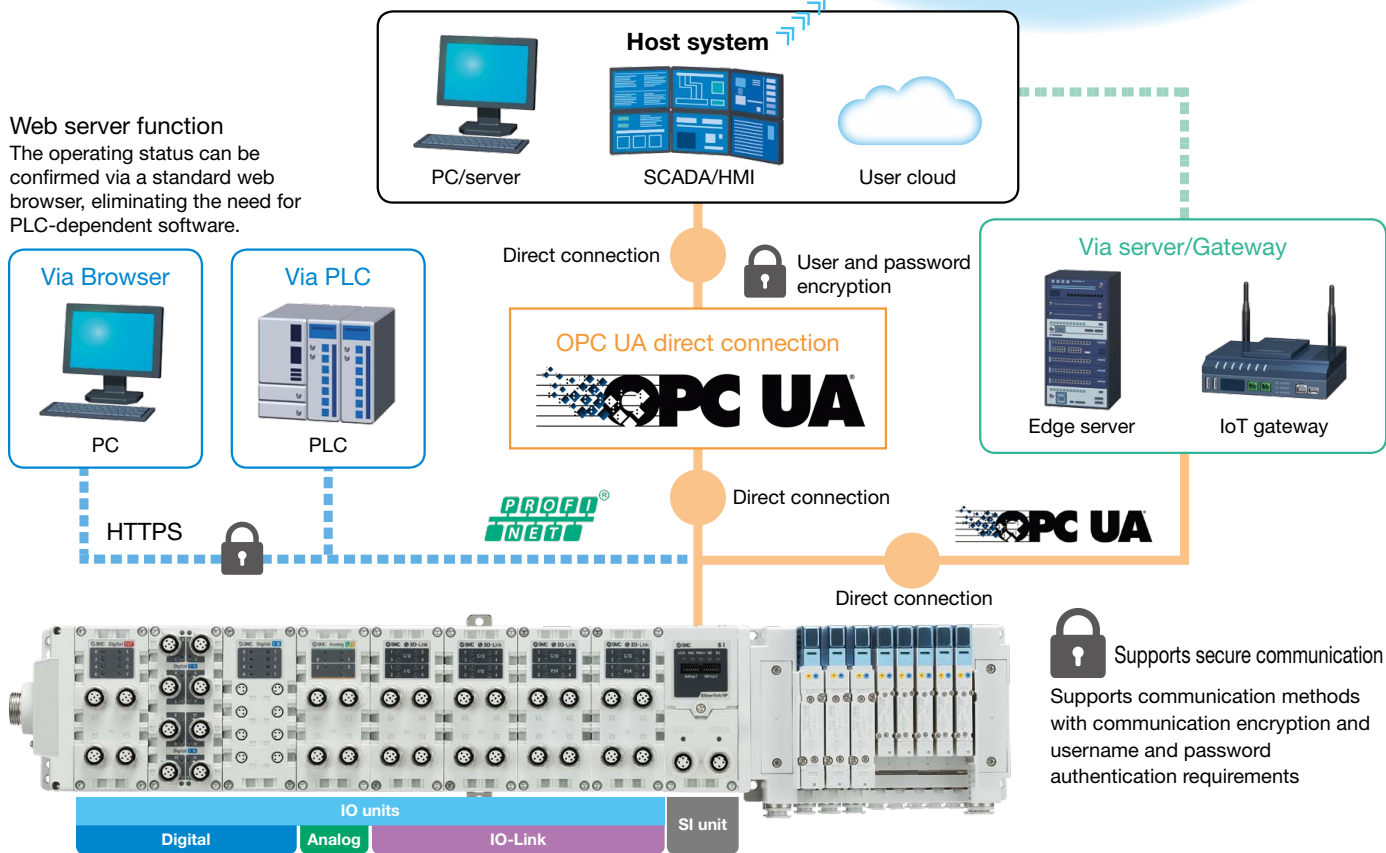

Flow, pressure, temperature, and other sensor information can be communicated to the host system via Industrial Ethernet or the OPC UA data communication protocol.

Equipment status can be monitored from another location or from outside the office.

Web server function

The operating status can be confirmed via a standard web browser, eliminating the need for PLC-dependent software.

OPC UA Newly supported functions

Supports the display of hierarchy
As objects are displayed by unit, equipment configuration is easy to understand.

Supports the text display of operating status
As the unit operating status numerical value is also displayed as text, information is easy to understand.

#	Server	Display Name	Value
1	EX600@192.168.0.2	Communication status	1 (Communication is established (Idle))
2	EX600@192.168.0.2	Port status info	4 (Operate)
3	EX600@192.168.0.2	Port status info	1 (Deactivated)
4	EX600@192.168.0.2	Port status info	5 (Standard I/O input)
5	EX600@192.168.0.2	Port status info	6 (Standard I/O output)

EX600 Series

Specifications

EX600-SEC3/4

SI Unit (EX600-SEC□) EtherCAT

Model		EX600-SEC3	EX600-SEC4
Communication	Protocol	EtherCAT (Conformance Test Record V.2.3.0)	
	Communication speed	100 Mbps	
	Configuration file	XML file*1	
	Web server function	●	
IO-Link unit		●	
Internal current consumption (Power supply for Control/Input)		120 mA or less	
Output	Output type	Source/PNP (Negative common)	Sink/NPN (Positive common)
	Number of outputs	32 outputs (8/16/24/32 outputs selectable)	
	Load	Solenoid valve with surge voltage suppressor 24 VDC, 1.0 W or less (SMC)	
	Power supply	24 VDC, 2 A	
	Fail safe	HOLD/CLEAR/Forced power ON	
	Protection	Short-circuit protection	
Enclosure		IP67 (Manifold assembly)	
Standards		CE/UKCA marking, UL (CSA)	
Weight		300 g	

*1 The configuration file can be downloaded from the SMC website

EX600-SPN3/4/31

SI Unit (EX600-SPN□) PROFINET

Model		EX600-SPN3	EX600-SPN4	EX600-SPN31
Communication	Protocol	PROFINET IO (Conformance Class C)		PROFINET IO (Conformance Class B)
	Communication speed	100 Mbps		
	Configuration file	GSDML file*2		
	Fast Start Up (Communication connection time)	● (Approx. 500 ms)		●*3 (Approx. 1 s)
	MRP	●		
	System Redundancy S2	●		
	Web server function	●		
	OPC UA server function	—		●
IO-Link unit		●		
Internal current consumption (Power supply for Control/Input)		120 mA or less		
Output	Output type	Source/PNP (Negative common)	Sink/NPN (Positive common)	Source/PNP (Negative common)
	Number of outputs	32 outputs		
	Load	Solenoid valve with surge voltage suppressor 24 VDC, 1.0 W or less (SMC)		
	Fail safe	HOLD/CLEAR/Forced power ON		
	Protection	Short-circuit protection		
Enclosure		IP67 (Manifold assembly)		
Standards		CE/UKCA marking, UL (CSA)		
Weight		300 g		

*2 The configuration file can be downloaded from the SMC website. *3 When the OPC UA server is set to disabled

	Number of inputs		8 inputs (2 inputs/Connector)		8 inputs (1 input/Connector)		16 inputs (2 inputs/Connector)	
	Supplied voltage		24 VDC					
	Max. supplied current		0.5 A/Connector 2 A/Unit		0.25 A/Connector 2 A/Unit		0.5 A/Connector 2 A/Unit	
	Protection		Short-circuit protection					
	Input current (at 24 VDC)		9 mA or less					
	ON voltage		17 V or more (At NPN input, between the pin for input terminal and supplied voltage of +24 V) (At PNP input, between the pin for input terminal and supplied voltage of 0 V)					
	OFF voltage		5 V or less (At NPN input, between the pin for input terminal and supplied voltage of +24 V) (At PNP input, between the pin for input terminal and supplied voltage of 0 V)					
	Open circuit detection current	2 wires	—		0.5 mA/Input*2		—	
3 wires		—		0.5 mA/Connector*2		—		
Current consumption			50 mA or less		55 mA or less		70 mA or less	
Enclosure			IP67 (Manifold assembly)					
Standards			CE/UKCA marking, UL (CSA)					
Weight			300 g		275 g		340 g	

*1 M12 (4-pin) connector can be connected.

*2 Function only applies to the EX600-DX□C1.

*3 When connecting the M8 plug connector, the tightening torque must be 0.2 N·m \pm 10%. If tightened with an excessive tightening torque, this may cause the connector thread of the unit to break.

Specifications

EX600-AXA

Analog Input Unit

Model		EX600-AXA	
Input	Input type	Voltage input	Current input
	Input connector	M12 (5-pin) socket*1	
	Input channel	2 channels (1 channel/Connector)	
	Supplied voltage	24 VDC	
	Max. supplied current	0.5 A/Connector	
	Protection	Short-circuit protection	
	Input signal range	12 bit resolution	0 to 10 V, 1 to 5 V, 0 to 5 V
		16 bit resolution	–10 to 10 V, –5 to 5 V
	Max. rated input signal	±15 V	±22 mA*2
	Input impedance	100 kΩ	50 Ω
	Linearity (25°C)	±0.05% F.S.	
	Repeatability (25°C)	±0.15% F.S.	
	Absolute accuracy (25°C)	±0.5% F.S.	±0.6% F.S.
	Current consumption	70 mA or less	
Enclosure		IP67 (Manifold assembly)	
Standards		CE/UKCA marking, UL (CSA)	
Weight		290 g	

*1 M12 (4-pin) connector can be connected.

*2 When input signal exceeds 22 mA, the protection function activates and the input signal is interrupted.

EX600-AYA

Analog Output Unit

Model		EX600-AYA	
Output	Output type	Voltage output	Current output
	Output connector	M12 (5-pin) socket*3	
	Output channel	2 channels (1 channel/Connector)	
	Supplied voltage	24 VDC	
	Max. load current	0.5 A/Connector	
	Protection	Short-circuit protection	
	Output signal range	12 bit resolution	0 to 10 V, 1 to 5 V, 0 to 5 V
		16 bit resolution	–10 to 10 V, –5 to 5 V
	Load impedance	1 kΩ or more	600 Ω or less

	Output type	Voltage output	Current output
Output	Output connector	M12 (5-pin) socket*1	
	Output channel	2 channels (1 channel/Connector)	
	Supplied voltage	24 VDC	
	Max. load current	0.5 A/Connector	
	Protection	Short-circuit protection	
	Output signal range	12 bit resolution	0 to 10 V, 1 to 5 V, 0 to 5 V
			0 to 20 mA, 4 to 20 mA
	Load impedance	1 kΩ or more	600 Ω or less
	Linearity (25°C)	±0.05% F.S.	
	Repeatability (25°C)	±0.15% F.S.	
	Absolute accuracy (25°C)	±0.5% F.S.	±0.6% F.S.
Current consumption		100 mA or less	
Enclosure		IP67 (Manifold assembly)	
Standards		CE/UKCA marking, UL (CSA)	
Weight		300 g	

*1 M12 (4-pin) connector can be connected.

*2 When input signal exceeds 22 mA, the protection function activates and the input signal is interrupted.

Specifications

EX600-L□B1

IO-Link Unit

Model		EX600-LAB1	EX600-LBB1
IO-Link version		Version 1.1	
IO-Link port class		Class A	Class B
Communication speed		COM1 (4.8 kBaud) COM2 (38.4 kBaud) COM3 (230.4 kBaud) * Changes automatically according to the connected device	
Number of IO-Link ports		4	
Compatible SI unit (Protocol)		EX600-SEN7/8 (EtherNet/IP™) EX600-SPN3/4/31 (PROFINET) EX600-SEC3/4 (EtherCAT)	
Max. supply current	Device power supply (L+)	0.5 A/Connector (2 A/Unit)	0.5 A/Connector (1 A/Unit)
	External power supply (P24)	—	1.6 A/Connector (3 A/Unit)
Input	Pin no.	2	4
	Input type	PNP	
	Protection	Short-circuit protection	
	Rated input current	Approx. 2.5 mA	Approx. 5.8 mA
	ON voltage	13 V or more	
Output	OFF voltage	8 V or less	
	Pin no.	4	
	Output type	PNP	
	Max. load current (C/Q line)	0.25 A/Output (Supplied from the power supply for control/input)	
	Protection	Short-circuit protection	
Current consumption		50 mA or less	
Enclosure		IP67 (Manifold assembly)	
Standards		CE/UKCA marking, UL (CSA)	
Weight		320 g	

EX600-TDX1

EX600-TDX2

Terminal Unit (IO-Link input unit)

Model		EX600-TDX1	EX600-TDX2
Communication	IO-Link version	Version 1.1	
	IO-Link port class	Class A	
	Communication speed	COM3 (230.4 kBaud)	
	Configuration file	IODD file*1	
Electrical	Power supply voltage range	24 VDC ±25%	
	Internal current consumption	50 mA or less	
Input	Max. supplied current	1 A/Connector No.0 to 7, 1 A/Connector No.8 to 15 2 A/Unit	
	Input type	PNP	
	Input connector	M12 (4-pin) socket*2	M8 (3-pin) socket*3
	Number of inputs	32 inputs (2 inputs/Connector)	16 inputs (1 input/Connector)
	Input current (at 24 VDC)	Typ. 4 mA	
	ON voltage	11 to 30 V	
	OFF voltage	-3 to 5 V	
	Protection	Short-circuit protection	
Enclosure		IP67	
Standards		CE/UKCA marking, UL (CSA)	
Weight		450 g	250 g

*1 The configuration file can be downloaded from the SMC website. *2 M12 (5-pin) connector can be connected.

*3 When connecting the M8 plug connector, the tightening torque must be 0.2 N·m ±10%.

If tightened with an excessive tightening torque, this may cause the connector thread of the unit to break.

1 End Plate Bracket

This bracket is used for the end plate of DIN rail mounting.

EX600-ZMA2

Enclosed parts

Round head screw (M4 x 20) 1 pc.
P-tight screw (4 x 14) 2 pcs.

EX600-ZMA3

(Specialized for SY series)

Enclosed parts

Round head screw with washer (M4 x 20) 1 pc.
P-tight screw (4 x 14) 2 pcs.

2 Valve Plate

EX600-ZMV1

Enclosed parts

Round head screw (M4 x 6) 2 pcs.
Round head screw (M3 x 8) 4 pcs.

EX600-ZMV2

(Specialized for SY series)

Enclosed parts

Round head screw (M4 x 6) 2 pcs.
Round head screw (M3 x 8) 2 pcs.

③ End Plate (U side)

The end plate is for use when the manifold valve is not connected.

Nil	Without DIN rail mounting bracket	—
2	With DIN rail mounting bracket	For EX600-ED□-2
3	With DIN rail mounting bracket	For EX600-ED□-3

* Select in accordance with the symbol for the end plate (D side) mounting method.

● Specification

Symbol	Specification
1	Waterproof cover

● End plate mounting position: U side

● End plate

EX600-EU1

Enclosed parts

Round head screw (M4 x 5) 2 pcs.

④ Reinforcing Brace

This bracket is used on the bottom of the unit at the intermediate position for connecting 6 units or more.

* Be sure to attach this bracket to prevent connection failure between the units caused by deflection.

For Direct mounting
EX600-ZMB1

Enclosed parts

Round head screw (M4 x 5) 2 pcs.

For DIN rail mounting
EX600-ZMB2

Enclosed parts

Round head screw (M4 x 6) 2 pcs.

⑤ Seal Cap (10 pcs.)

Be sure to mount a seal cap on any unused I/O connectors. Otherwise, the specified enclosure cannot be maintained.

EX9-AWES
For M8

EX9-AWTS
For M12

⑥ Marker (1 sheet, 88 pcs.)

The signal name of I/O device and each unit address can be entered and mounted on each unit.

⑫ Field-wireable Communication Connector

Plug

For CC-Link For DeviceNet®
PCA-1075526 PCA-1075528

For PROFIBUS DP
PCA-1075530

Applicable Cable

Item	Specifications
Cable O.D.	4.0 to 8.0 mm
Wire gauge (Stranded wire cross section)	0.14 to 0.75 mm ² /AWG26 to 18 (Solid cable/Flexible cable) 0.08 to 0.5 mm ² /AWG28 to 20 (With ferrule)

For EtherCAT® For PROFINET For EtherNet/IP™
PCA-1446553

Applicable Cable

Item	Specifications
Cable O.D.	4.0 to 8.0 mm
Wire gauge (Stranded wire cross section)	0.14 to 0.34 mm ² /AWG26 to 22

* The table above shows the specifications for the applicable cable. Adaptation for the connector may vary on account of the conductor construction of the electric wire.

Socket

For CC-Link For DeviceNet®
PCA-1075527 PCA-1075529

For PROFIBUS DP
PCA-1075531

Applicable Cable

Item	Specifications
Cable O.D.	4.0 to 8.0 mm
Wire gauge (Stranded wire cross section)	0.14 to 0.75 mm ² /AWG26 to 18 (Solid cable/Flexible cable) 0.08 to 0.5 mm ² /AWG28 to 20 (With ferrule)

13 I/O Cable with Connector, I/O Connector

For details, refer to the **Web Catalog**.

Name	Use	Part no.	Description
Cable with connector		PCA-1557769	Cable with M12 connector (4 pins/3 m)
		PCA-1557772	Cable with M8 connector (3 pins/3 m)
Field-wireable connector		PCA-1557730	Field-wireable connector (M8/3 pins/Plug/Piercecon® connection)
		PCA-1557743	Field-wireable connector (M12/4 pins/Plug/QUICKON-ONE connection/SPEEDCON)
		PCA-1557756	Field-wireable connector (M12/4 pins/Plug/QUICKON-ONE connection/SPEEDCON)
Y connector		PCA-1557785	Y connector (2 x M12 (5 pins)-M12 (5 pins)/SPEEDCON)
		PCA-1557798	Y connector (2 x M8 (3 pins)-M12 (4 pins)/SPEEDCON)

* When using the Y connector, connect it to the connector on the I/O unit through the sensor cable (PCA-1557769) with the M12 connector.

Ex.: Set the auto switch on the cylinder rod side to IN2 on the IO-Link input unit, and set the auto switch on the cylinder head side to IN3 on the IO-Link input unit.

⇒ An abnormality is detected when both auto switches turn ON simultaneously.

EX600 Series

13 I/O Cable with Connector, I/O Connector

For IO-Link Cable

Cable length (L)

005	500 mm
010	1000 mm
020	2000 mm
030	3000 mm
050	5000 mm
100	10000 mm

Port Class B EX260-SIL SI Unit and Port Class A IO-Link Master Connection Example

Y Branch Connector for IO-Link

This connector is used to supply power to the valve manifold by branching the IO-Link communication cable in cases where a port class A IO-Link master is used.

EX9-ACY02-S

14 IO-Link Device Tool License Key

USB dongle

EX9-ZSW-LDT1

* The IO-Link Device Tool V5-PE (V5 or later only) manufactured by TMG is required for setting IO-Link devices.
The IO-Link Device Tool can be downloaded for free from TMG's website. However, to use it for more than 30 days, a license key for the IO-Link Device Tool is required.

EX600 Series

Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For fieldbus system precautions, refer to the "Operation Manual" on the SMC website.

Mounting

⚠ Caution

1. When handling and assembling units, do not touch the sharp metal parts of the connector or plug.
2. When connecting six stations or more, be sure to use the intermediate reinforcing brace (EX600-ZMB1 or EX600-ZMB2).

Operating Environment

⚠ Caution

1. Select the proper type of enclosure according to the operating environment.

IP65/67 is achieved when the following conditions are met.

- 1) Provide appropriate wiring between all units using electrical wiring cables, communication connectors and cables with M12 connectors.

- 2) Appropriately mount each unit and valve manifold.

- 3) Be sure to mount a seal cap on any unused connectors.

If using in an environment that is exposed to water splashes, please take measures such as using a cover.

When the enclosure is IP40, do not use in an operating environment or atmosphere where it may come in contact with corrosive gas, chemical agents, seawater, water, or water vapor. When connected to the EX600-D□□E or EX600-D□□F, manifold enclosure is IP40.

Also, the handheld terminal conforms to IP20, so prevent foreign matter from entering inside, and water, solvent or oil from coming in direct contact with it.

Adjustment / Operation

⚠ Warning

<Handheld Terminal>

1. Do not apply pressure to the LCD.

There is a possibility of the crack of LCD and injuring.

2. The forced input/output function is used to change the signal status forcibly. When operating this function, be sure to check the safety of the surroundings and installation.

This may cause injuries or equipment damage.

3. Incorrect setting of parameters can cause a malfunction. Be sure to check the settings before use.

This may cause injuries or equipment damage.

⚠ Caution

<Handheld Terminal>

1. Do not press the setting buttons with a sharp pointed object.

This may cause damage or equipment failure.

2. Do not apply excessive load and impact to the setting buttons.

This may cause damage, equipment failure or malfunction.

When the order does not include the SI unit, a valve plate which connects the manifold and SI unit, is not mounted. Use attached valve holding screws and mount the valve plate.

(Tightening torque: 0.6 to 0.7 N·m)

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components
ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components
IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1: Robots etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. SMC products cannot be used beyond their specifications. They are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not allowed.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, combustion equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

Caution

SMC develops, designs, and manufactures products to be used for automatic control equipment, and provides them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not allowed.

Products SMC manufactures and sells cannot be used for the purpose of transactions or certification specified in the Measurement Act of each country. The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) **Suction cups (Vacuum pads) are excluded from this 1 year warranty.**

A suction cup (vacuum pad) is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the suction cup (vacuum pad) or failure due to the deterioration of rubber material are not allowed by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Revision History

Edition B	* The EtherNet/IP™ communication protocol has been added. * An analog output unit and an input/output unit have been added. * A D-sub connector and a spring type terminal block have been added. * SY3000/5000 series valves have been added as applicable solenoid valves. * Number of pages has been decreased from 64 to 60.	OW PX RS TS
Edition C	* The EtherCAT® communication protocol has been added.	
Edition D	* The PROFINET communication protocol has been added.	
Edition E	* A dual port EtherNet/IP™ product has been added. * SY7000 series valves have been added as applicable solenoid valves.	

Edition F	* The IO-Link unit has been added. * JSY series valves have been added as connectable valves. * The “How to Order” and “Dimensions” pages of the connectable valves have been deleted. * An end plate (D side) and M12 (4/5 pins) A-coded power supply connectors have been added. * Number of pages has been decreased from 68 to 48.	YT ZR
Edition G	* An IO-Link compatible SI unit has been added (PROFINET).	
Edition H	* An IO-Link compatible terminal unit has been added. Number of pages has been increased from 48 to 56.	

 **Safety Instructions** Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
