## **Clamp Cylinder** ø40, ø50, ø63

weight % reduction

1.96 kg ▶ 1.82 kg

Compared with the existing CK1 series model, ø63, 150 mm stroke

### 3 types of clevis widths

**12.5** mm **16.5** mm **19.5** mm

Possible to select depending on the application

Mounting dimensions are interchangeable with the existing CK1 series model.

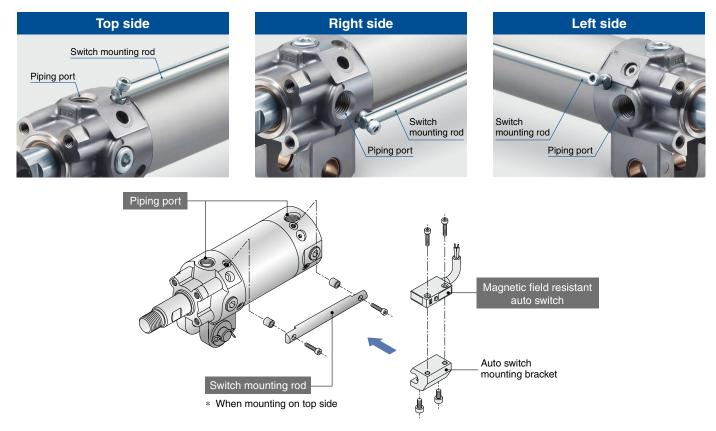

Clevis is mounted.

Mounting dimension Interchangeable

New

RoHS

# Switch mounting rod and piping port are mountable in three orientations.

### Various types of auto switches can be mounted.

#### **End Brackets**

#### Single Knuckle Joint

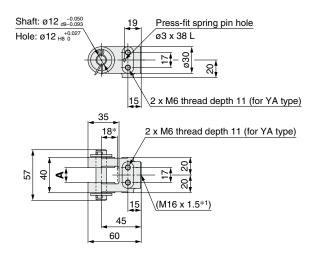

Part no.	End bracket symbol	Applicable clamp cylinder
CKB-I04	I (M6 without tap)	CK□1A series
CKB-IA04	IA (M6 with tap)	CK□1B series

 $\ast 1\,$  Refer to the dimensions on page 8 for the M16 x 1.5 piston rod end mounting dimension.

\* A spring pin is attached to the single knuckle joint as a standard.

#### **Double Knuckle Joint**

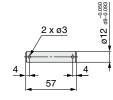

Material: Cast iro	n		Unit: mm	
Part no.	End bracket symbol	Α	Applicable clamp cylinder	
CKA-Y04	Y (M6 without tap)	16.5 <sup>+0.3</sup>	CK⊡1A series	
CKA-YA04	YA (M6 with tap)	10.5 0		
CKB-Y04	Y (M6 without tap)	19.5 <sup>+0.4</sup>	CK□1B series	
CKB-YA04	YA (M6 with tap)	19.5 0		
CKC-Y04	Y (M6 without tap)	12.5 +0.3	CK⊡1C series	
CKC-YA04	YA (M6 with tap)	12.5 0		

 $\ast 1\,$  Refer to the dimensions on page 8 for the M16 x 1.5 piston rod end mounting dimension.

\* A knuckle pin, cotter pins, flat washers, and a spring pin are attached to the double knuckle joint as a standard.

\* The dimension with \* shows the value when mounted on the piston rod.

Pin

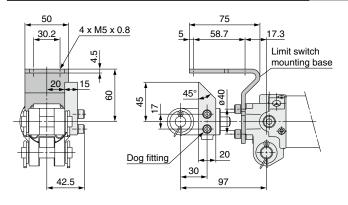

Material: Carbon steel

Part no.	Usage
CK-P04	Knuckle pin Clevis pin

\* Cotter pins and flat washers are attached to the pin as a standard.

#### Limit Switch Mounting Base/Dog Fitting

#### Material: Rolled steel

Part no.	Option symbol	Description	Applicable clamp cylinder	
CK-B04	В	Limit switch mounting base	CK⊡1 series	
CK-D04	D	Dog fitting		

\* Limit switch mounting base and dog fitting can be repositioned by removing the hexagon socket head cap screw.

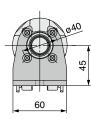

\* When ordering the limit switch mounting base and the dog fitting individually, mounting bolts (hexagon socket head cap screw) and spring washers will be attached as a standard.

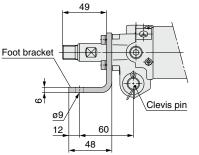

### $\triangle$

When you attach a dog fitting, be sure to use a knuckle joint, M6 with tap (end bracket symbol IA or YA).

The dog fitting cannot be attached to the knuckle joint, M6 without tap (end bracket symbol I or Y).

#### Foot Bracket

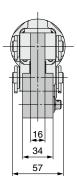

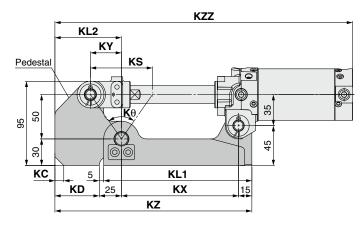

Material: Rolled steel

Part no.	Option symbol	Applicable clamp cylinder				
CK-L04	L	CK□1 series				

- \* A mounting bolt (hexagon socket head cap screw) and a spring washer will be attached as a standard for the foot bracket.
- \* When mounting the cylinder, use both the foot bracket and clevis pin. Please avoid using the foot bracket by itself as this may result in damage.

#### Pedestal

#### Material: Rolled steel

<b>D-A9</b> □	В	26	27.5	27.5				
	Hs	35	40.5	47.5				

\* The mounting position should be referred for reference only for the auto switch mounting position at the stroke end detection. Adjust the auto switch after confirming the operation to set actually.

\* The auto switch mounting position is temporarily set at the time of shipping from our factory. Change it to the desired position in accordance to your facility.

∗ For the D-M9□/M9□W/M9□A/A9□, A and B are the dimensions from the end of the head cover/rod cover to the end of the auto switch.

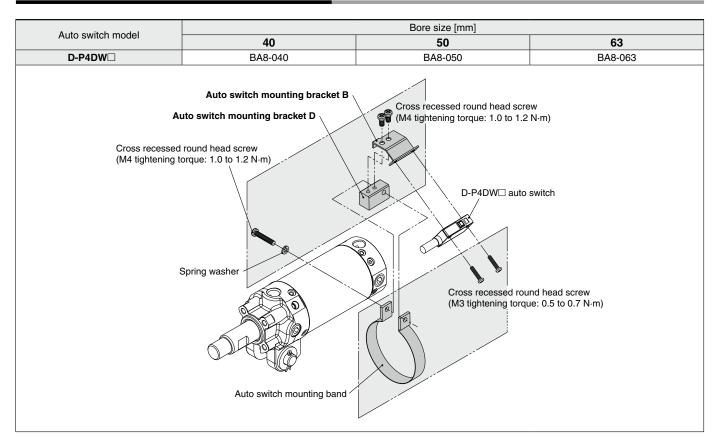

\* As for the D-P4DW type, band mounting type, the auto switch mounting bracket and the auto switch have to be ordered separately. For details, refer to page 15.

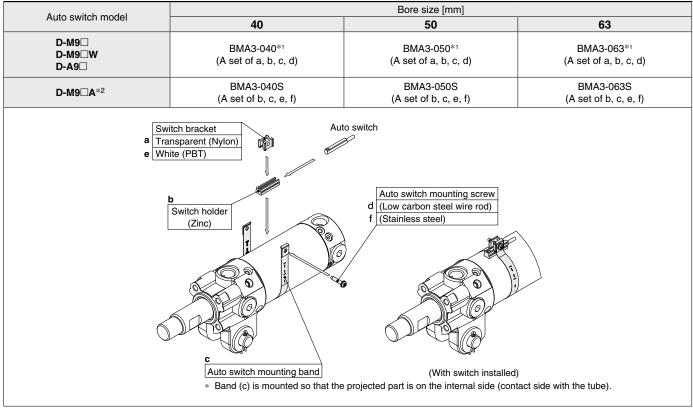

\* In the case of a 2-color indicator auto switch, mount it at the center of the green LED illuminating range.

#### Minimum Stroke for Auto Switch Mounting Unit: mm

		<u>v</u>				
		With 2 pcs.				
Auto switch model	With 1 pc.	Different surfaces	Same surface			
D-P4DW						
D-M9□ D-M9□W D-M9□A	50	50	50			
D-A9						

#### Auto Switch Mounting Brackets/Part Nos.

\*1 Since the switch bracket (made of nylon) is affected in an environment where alcohol, chloroform, methylamines, hydrochloric acid, or sulfuric acid is splashed over, so it cannot be used. Please contact SMC regarding other chemicals.

<sup>\*2</sup> When mounting a D-M9DA(V) type auto switch, if the switch bracket is mounted on the indicator light, it may damage the auto switch. Therefore, be sure to avoid mounting the switch bracket on the indicator light.

### CKG1 Series Auto Switch Mounting

#### Magnetic Field Resistant Auto Switch D-P4DW /Band Mounting Compliant

Band mounting of the magnetic field resistant auto switch (D-P4DW) to the CKG1 series is possible by ordering the switch mounting bracket and the auto switch individually.

#### How to Order

Please order the switch mounting bracket, auto switch, and clamp cylinder individually. Refer to the table below for auto switch mounting bracket part numbers.

Part no.	Applicable auto switch model	Applicable clamp cylinder
BA8-040	D-P4DWSC	CKG1□40
BA8-050	D-P4DWSE	CKG1□50
BA8-063	D-P4DWL/Z	CKG1□63

#### **Ordering Example**

Example case ① Cylinder: CKG1A50-50YZ1 ·······1 Example case ② Magnetic field resistant auto switch: D-P4DWSC ·······2

- \* Please order the same quantity for the switch mounting bracket and the magnetic field resistant auto switch respectively.
- Band mounting for the magnetic field resistant auto switches D-P79WS□, D-P74□ is not applicable.

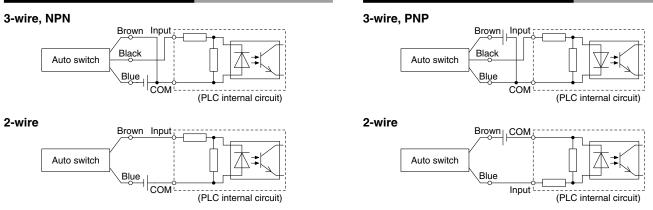

#### Applicable Magnetic Field Resistant Auto Switches/Refer to the Web Catalog for detailed auto switch specifications.

Applicable cylinder	Туре	Auto switch model	Applicable magnetic field	Electrical entry	Indicator light	Wiring (Pin no. in use)	Load voltage	Lead wire length	Applicable load
CKG1	Solid state auto switch	P4DWSC AC mag	AC magnetic field	Pre-wired	2-color indicator	2-wire (3-4)	24 VDC	0.3 m	Relay, PLC
		P4DWSE	(Single-phase AC welding magnetic field)	connector		2-wire (1-4)			
		P4DWL		Grommet		2-wire	24 VDC	3 m	
		P4DWZ						5 m	

## **Prior to Use Auto Switch Connections and Examples**

Source Input Specifications

#### Sink Input Specifications

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

#### Examples of AND (Series) and OR (Parallel) Connections

When two auto switches are

connected in series, a load

may malfunction because

the load voltage will decline when in the ON state.

The indicator lights will light

up when both of the auto

switches are in the ON state.

Auto switches with a load

voltage less than 20 V cannot

be used. Please contact SMC

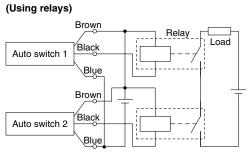

if using AND connection for a

heat-resistant solid state auto

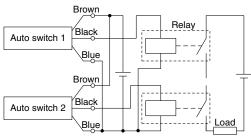

switch or a trimmer switch.

When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid. Depending on the operating environment, the product may not operate properly.

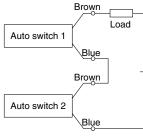

#### 3-wire AND connection for NPN output

#### 3-wire AND connection for PNP output (Using relays)

#### 2-wire AND connection

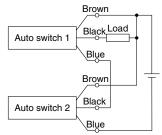

Example) Load voltage at ON Power supply voltage: 24 VDC Internal voltage drop: 4 V

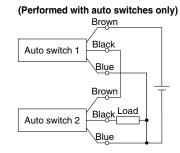

Load voltage at ON = Power supply voltage -Internal voltage drop x 2 pcs.

= 24 V - 4 V x 2 pcs.

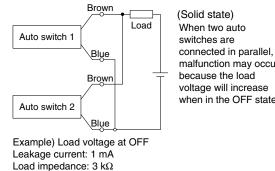

#### = 16 V

#### (Performed with auto switches only)

#### 2-wire OR connection

Load voltage at OFF = Leakage current x 2 pcs. x

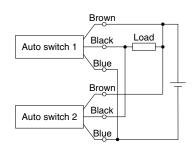

= 6 V

Load impedance

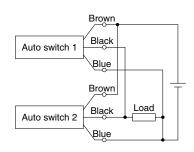

= 1 mA x 2 pcs. x 3 kΩ

malfunction may occur because the load voltage will increase when in the OFF state.

#### 3-wire OR connection for NPN output

#### 3-wire OR connection for PNP output

#### (Reed)

Because there is no current leakage, the load voltage will not increase when turned OFF However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

# *CK Series* **Specific Product Precautions 1**

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website.

#### **Cushion/Speed Controller Adjustment**

### \land Danger

1. The speed controller valve and cushion valve are crimped. Do not rotate from a fully closed state, by more than 2 rotations for more for the cushion valve and 4.5 rotations (Ø40: 2 rotations) for the speed controller valve.

Exceeding these limits is dangerous because it may cause the valves to be detached and ejected.

Piping Port/Switch Mounting Rod Location Change

### \land Caution

1. Do not leave out the component parts when the piping port location is changed.

Even if one of the component parts is kept away, malfunction may occur, resulting in dangerous operation.

2. To prevent air leakage, re-wind the pipe tape and fit into the changed location when the piping port location is changed.

#### Handling

Magnetic field resistant auto switches D-P79WSE/ D-P74□ are specifically for use with strong magnet type cylinders and are not compatible with general auto switches or cylinders. Strong magnet type cylinders are labeled as follows.

Magnetic field resistant cylinder with built-in magnet (For use with auto switch D-P7)

#### Handling

#### Mounting

- 1. The minimum stroke for mounting magnetic field resistant auto switches is 50 mm.
- 2. In order to fully use the capacity of magnetic field resistant auto switches, strictly observe the following precautions.
  - 1) Do not allow the magnetic field to occur when the cylinder piston is moving.
  - 2) When a welding cable or welding gun electrodes are near the cylinder, change the auto switch position to fall within the operational ranges shown in the graphs on page 18, or move the welding cable away from the cylinder.
  - 3) Cannot be used in an environment where welding cables surround the cylinder
  - 4) Please consult with SMC when a welding cable and welding gun electrodes (something energized with secondary current) are near multiple auto switches.
- 3. In an environment where spatter directly hits the lead wire, cover the lead wire with protective tubing.

Use protective tubing with inside diameter of  $\emptyset 8$  or more that has excellent heat resistance and flexibility.

- 4. Be careful not to drop objects, make dents, or apply excessive impact force when handling.
- 5. When operating two or more cylinders with magnetic field resistant auto switches in parallel and proximity, separate the auto switches from other cylinder tubes by an additional 30 mm or more.
- 6. Avoid wiring in a manner in which repeated bending stress or tension is applied to lead wires.
- 7. Please consult with SMC regarding use in an environment with constant water and coolant splashing.

8. Be careful of the mounting direction of the magnetic field resistant auto switch D-P79WSE. Be sure to face the soft-resin mold surface to the switch mounting bracket side for mounting.

(Refer to page 11 for mounting example and the **Web** Catalog for soft-resin mold surface.)

#### Wiring/Current and Voltage

- 1. Always connect the auto switch to the power supply after the load has been connected.
- 2. Series connection When auto switches are connected in series as shown below:

Note that the voltage drop due to the internal resistance of the LED increases.

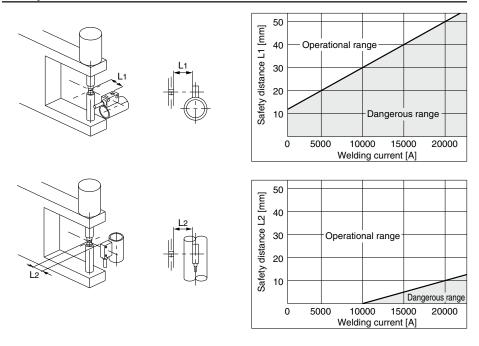

# *CK Series* **Specific Product Precautions 2**

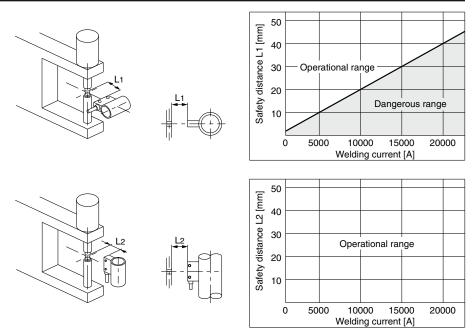

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website.

### ▲ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "**Caution**," "**Warning**" or "**Danger**." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)<sup>\*1</sup>, and other safety regulations.

- Caution: indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.
- Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

**Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

#### **A**Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

- 3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
  - The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
  - 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
  - 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

### 4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

- 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
- 2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
- An application which could have negative effects on people, property, or animals requiring special safety analysis.
- 4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

- \*1) ISO 4414: Pneumatic fluid power General rules relating to systems.
  - ISO 4413: Hydraulic fluid power General rules relating to systems. IEC 60204-1: Safety of machinery – Electrical equipment of machines. (Part 1: General requirements)
  - ISO 10218-1: Manipulating industrial robots Safety. etc.

#### 

 The product is provided for use in manufacturing industries. The product herein described is basically provided for peaceful use in manufacturing industries. If considering using the product in other industries, consult SMC beforehand

and exchange specifications or a contract if necessary. If anything is unclear, contact your nearest sales branch.

#### Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

#### Limited warranty and Disclaimer

- The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

\*2) Vacuum pads are excluded from this 1 year warranty. A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### **Compliance Requirements**

- The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

#### 

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

A Safety Instructions Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
