

Crust Breaker Cylinder

For High Performance Aluminum Smelters

- Energy Savings
- Longer Life
- Easy Maintenance
- Lower Carbon Emissions

Increase Productivity and Reduce Production Costs

SMC Crust Breaker Cylinder

Making a Difference!

Providing Energy Savings, Longer Service Life and Reducing Carbon Emissions.

- Special Dust Resistant Construction
- Special Heat Resistant Construction
- Special Anti-Lateral Load Construction

Easy Maintenance

- Mounting dimensions same as current crust breaker cylinders
- Retaining plate reduces repair time for seal packing replacement

Three models of Crust Breaker Cylinders to meet varying environmental conditions

Standard Cylinder

Medium Duty Cylinder

Heavy Duty Cylinder

CO₂ reduction can be realized with SMC's Crust Breaker Cylinder

Typically carbon emissions can occur when a cylinder is not breaking the crust formed in a pot every time it is extended.

SMC Crust Breaker Cylinders continued dependability of no force lost do to any internal air leakage assures preventing increased CO₂ emissions due to higher pot temperatures.

SMC's Crust Breaker Cylinders performance can help provide approximately 45% reduction in CO₂ emissions. Helping the environment and reducing costs.

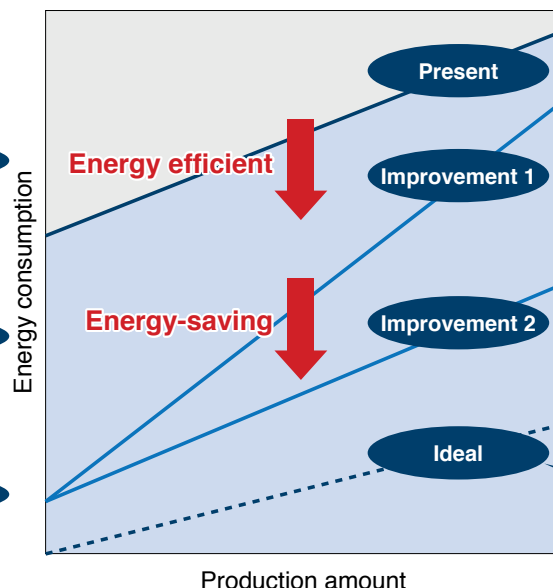

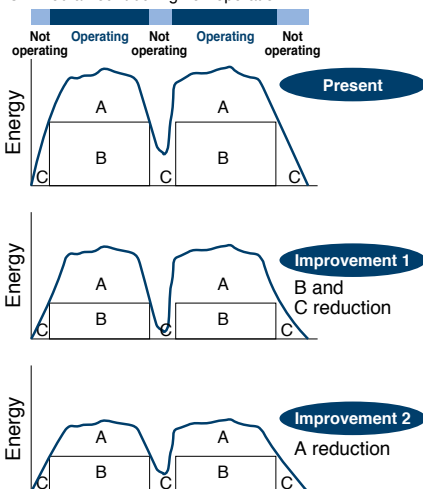

SMC's approach to Energy Savings

Energy-saving measures can be divided into two main categories. They are either energy efficient or energy saving.

Easy-to-implement, effective measures with a priority on energy efficiency can help you take your energy savings to the next level!

Factory production examples

A: Fluctuation amount in proportion to production
B: Fixed amount during operation
C: Fixed amount during non-operation

Energy efficient

Energy is only used when and where it is required.
Eliminates wasted energy!

Energy-saving

Only the required amount of energy is used.
Improves energy usage efficiency!

Consumption in proportion to the min. production ratio
No air is consumed during non-operation!
