

64-station Compatible Manifold

Plug-in Compact 5-Port Solenoid Valve

JSY3000-L Series

JSY3000-L Series Type 10 Plug-in Connector Connecting Base

Manifold Specifications

Wiring		Serial wiring EX260 for 64-station compatible manifold
Manifold type		Plug-in connector connecting base (64-station compatible manifold)
SUP/EXH port type		Common SUP/EXH (Common for the 3/5 port)
Valve stations		4 to 64 stations
Applicable connector		_
Internal wiring		Negative common
Port size	1(P), 3/5(E) port	ø10 One-touch fitting
	4(A), 2(B) port	ø4 One-touch fitting, ø6 One-touch fitting, ø8 One-touch fitting
Enclosure (Based on IEC 60529)		IP67

Formula for 64-station Compatible Manifold Weight*1

(Unit: g)

 $W = 47 \times n_1 + 473 + 138 \times n_2$

n1: Valve stations*2

n2: Number of intermediate SUP/EXH blocks

*2 Stations are only available in multiples of 4, from 4 stations to 64 stations.

*1 Weight: "W" is the value for the internal pilot specification, the max. fitting size, and the manifold only. The valve weight is not included. To obtain the weight with valves mounted, add the valve weight given in the Web Catalog for the appropriate number of stations.

Manifold Flow Rate Characteristics

	Port size		Valve flow rate characteristics			
Model	1, 3/5	4, 2	1 $ ightarrow$ 4/2 (P $ ightarrow$	A/B)	4/2 → 3/5 (A/B	\rightarrow E)
	(P, E)	(A, B)	C [dm ³ /(s·bar)]	b	C [dm ³ /(s·bar)]	b
JJ5SY3-L10 (Side ported)	C10	C8	2.23	0.30	2.77	0.27

- * Calculation of effective area "S" and sonic conductance "C": S = 5.0 x C
- * Values measured in accordance with ISO 6358:1989, JIS B 8390:2000

⚠ Caution

Securing the DIN Rail Mounting Type Manifold

1. When mounting the manifold to a DIN rail using bolts, be sure that the bottom surface of the DIN rail is in contact with the manifold installation surface (in a horizontal state), then secure both ends of the DIN rail with the bolts. However, for other mounting methods or for side facing or upside down orientations, use the formula below to calculate the number of bolts to use at even intervals along the DIN rail.

Formula: Number of bolts = (Manifold stations + 5) / 5

(Round up to the nearest whole number)

Example) For 28 stations, secure in 7 locations as a guide.

2. When using the manifold with a DIN rail in an environment where any vibration or impact is applied to it, the DIN rail itself may break. In particular, if the installation surface vibrates when mounting the manifold on the wall, or if a load is directly applied to the manifold, the DIN rail may break, causing the manifold to drop. When any vibration, impact, or load will be applied to the manifold, be sure to use a direct mounting manifold.

3 SI unit

Symbol	Protocol	Connector	
0*1	Without SI unit		
F	PROFINET	M12	
E	EtherNet/IP™	M12	
D EtherCAT		M8	
K	IO-Link	M12	

*1 Not compatible with the DIN rail mounting type

4 Manifold polarity

Valve stations

Symbol	Stations	Note
04	4 stations	
08	8 stations	
:	:	Double wiring*2
60	60 stations	
64	64 stations	

*2 Double wiring: 2-position single, 2-position double, 3-position, and 4-position valves can be used on all manifold stations.

The use of a single solenoid will result in an unused control signal.

This also includes the number of blanking plates.

* For stations, only multiples of 4, from 4 stations to 64 stations, can be selected.

The 4 boards inside the manifold are integrated.

6 Manifold 1 (P) on both ends, 3/5(E) port exit position

U	U side (4 to 8 stations)
D	D side (4 to 8 stations)
В	Both sides (4 to 64 stations)

SUP/EXH block, Intermediate SUP/EXH block

Nil	Internal pilot
S	Internal pilot, Built-in silencer
R	External pilot

* The 3/5(E) port is plugged for the built-in silencer type.

Do not allow the air outlet to come into direct contact with water, etc.

* The external pilot specification should be ordered as Made to Order.

For details, refer to the $\ensuremath{\textbf{Web}}$ $\ensuremath{\textbf{Catalog}}.$

8 Number of intermediate SUP/EXH blocks, mounting position

Symbol	Quantity	Mounting position
0	0	_
1	1	Specify the mounting position
i	:	on the manifold specifications
6	6	sheet.

* A block can be installed for every 4 valve stations, but as a guideline, it is recommended that one be installed for every 8 to 12 stations.

9 4(A), 2(B) port size (Metric/One-touch fitting)

Symbol	A, B port	P, E port
C4	Straight ø4	
C6	Straight ø6	Straight a10
C8	Straight ø8	Straight ø10
CM*3	Straight port, mixed sizes	

*3 Indicate the sizes on the manifold specification sheet for "CM."

1 Mounting

	· · · •
Symbol	Mounting
Nil	Direct mounting
D *4	DIN rail mounting (With DIN rail)
D0 *5	DIN rail mounting (Without DIN rail)

- *4 Option "D" with DIN rail mounting is not compatible with the product without an SI unit.
- *5 Order the DIN rail separately, referring to dimension L3.
 - (Refer to the **Web Catalog** for DIN rail product numbers and lengths.)
- Refer to page 1 for details on securing the DIN rail mounting type manifold.

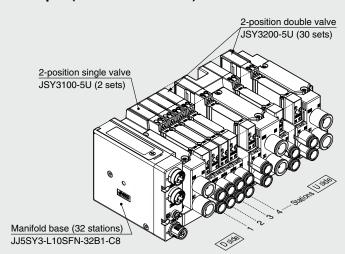

For details on the EX260 Integrated Type (For Output) Serial Transmission System, refer to the Web Catalog and the Operation Manual. For the part numbers of the SI units to be mounted, refer to page 5. Please download the Operation Manual via the SMC website.

JSY3000-L Series

How to Order Manifold Assembly

Example (JJ5SY3-L10SFN-□)

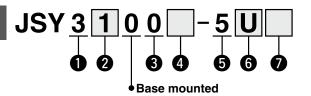

- JJ5SY3-L10SFN-32B1-C8...1 set (32-station manifold base part no.) *JSY3100-5U2 sets (2-position single part no.) *JSY3200-5U30 sets (2-position double part no.)
 - →The asterisk denotes the symbol for the assembly. Prefix it to the part numbers of the valve, etc.
- · For the valve arrangement, the valve closest to the D side is considered the 1st station.
- · Under the manifold part number, state the valves to be mounted in order starting with the 1st station as shown in the figure. If the arrangement becomes too complicated, specify the details on a manifold specification sheet.
- Use the manifold specifications sheet to specify the mounting position of the intermediate SUP/EXH blocks.
- * Stations are only available in multiples of 4.

Internal Pilot

How to Order Valves (With mounting screw)

Refer to the Web Catalog for valve specifications.

1	2-position	Single		
2	z-position	Double		
3	3-position 4-position dual 3-port	Closed center		
4		Exhaust center		
5		Pressure center		
Α		N.C./N.C.		
В		N.O./N.O.		
С		N.C./N.O.		

6 Light/surge voltage suppressor and common specification

Symbol	With light	Surge voltage suppressor	Common specification
U			Non-polar
NZ	•	•	Polar Negative common

- * Only "NZ" type is available with a power saving circuit.
- When the non-polar common specification type is selected, take measures to prevent surge voltage. For details, refer to the Web Catalog.

Manual override

* When ordering a valve individually, the base gasket is not included.

Since the base gasket is attached to the manifold, please order the base gasket separately if it is needed for maintenance.

Refer to the **Web Catalog** for base gasket and mounting screw part numbers.

⚠ Caution

If the product is to be continuously energized, please be sure to select the power-saving circuit (continuous duty type) specification.

Refer to the "With power-saving circuit" section in the "Specific Product Precautions" of the plugin type JSY series Web Catalog for details.

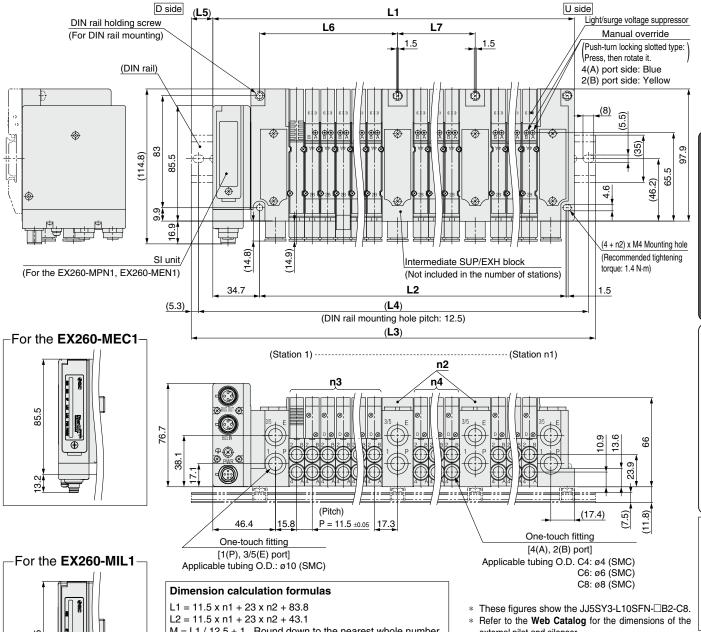

Type 10/Side Ported

Dimensions: JSY3000-L Series

EX260/64-station Compatible Manifold

JJ5SY3-L10S N - Stations D C4(D)

M = L1 / 12.5 + 1 Round down to the nearest whole number.

 $L3 = 12.5 \times M + 23$

L4 = L3 - 10.5

85

L5 = (L3 - L1)/2 Round up to the nearest whole number.

 $L6 = 11.5 \times n3 + 33.2$

 $L7 = 11.5 \times n4 + 23$

- n1: Number of JSY3000 valve stations (Multiples of 4)
- n2: Number of intermediate SUP/EXH blocks
- n3: Stations from the D side to the first intermediate SUP/EXH block
- n4: Stations between the intermediate SUP/EXH blocks

external pilot and silencer.

⚠ Caution

There will be slight variations in the width of manifold blocks due to tolerance.

As the manifold is made up of a combination of manifold blocks, there will be slight variations between the actual pitch dimensions of the mounting holes used to secure the manifold and the values stated in the catalog due to tolerance.

L: Dimensions when the intermediate SUP/EXH block count is $nz = 0$

Accessories

For details, refer to the Web Catalog (EX260 series).

* SMC does not provide cables for the EtherCAT compatible type (M8 connector). Order a cable from another cable manufacturer.

JSY3000-L Series Manifold Options

* Refer to page 9 for dimensions.

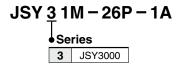

■Blanking plate

[With two mounting screws]

Used when valve additions are expected or for maintenance

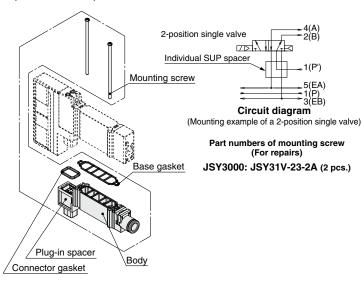

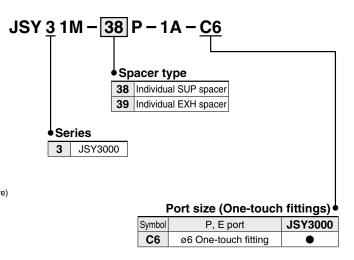

■ Individual SUP spacer

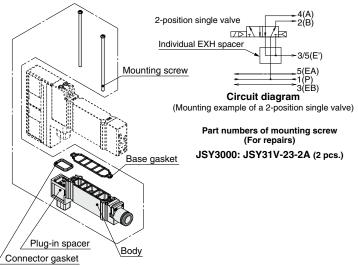

[With a connector gasket, a base gasket, and two mounting screws] When the same manifold is to be used for different pressures, an individual SUP spacer assembly can be used to act as a supply port for different pressures.

■ Individual EXH spacer

[With a connector gasket, a base gasket, and two mounting screws] When valve exhaust affects other stations due to the circuit configuration, this spacer can be used for individual valve exhaust.

Manifold Options JSY3000-L Series

■SUP/EXH blocking disk

[SUP blocking disk]

Inserting an SUP blocking disk in the pressure supply passage of a manifold valve can allow for the use of 2 different pressures (high and low) in 1 manifold.

[EXH blocking disk]

Inserting an EXH blocking disk in the exhaust passage of a manifold valve can separate the exhaust from the valve so it does not affect the other valves. It can also be used in positive pressure and vacuum pressure mixed manifolds. (2 pieces are required to block both the EA and EB sides of the EXH.)

Series	SUP blocking disk	EXH blocking disk
JSY3000	JSY31M-40P-1A	JSY31M-40P-2A

■ Labels for blocking disks

These labels can be used to indicate and confirm where on the manifold the SUP/EXH blocking disk assemblies were inserted. (3 labels of each)
