## Low Profile Air Gripper $\quad$ © ø8, ø12, ø16, ø20

Height dimension reduced to approximately $1 / 3$ with the same gripping force as the MHZ2-20

MHZ2-20D3
$72.8 \mathrm{~mm} \Rightarrow 25 \mathrm{~mm}$
(Comparison with our MHZ2 Series equivalent gripping

## 3 types of stroke lengths are available.

The stroke can be selected according to the workpiece.

| Short stroke | Medium stroke | Long stroke |
| :---: | :---: | :---: |
| $\mathbf{8}$ to $\mathbf{2 0 ~ m m ~}$ | $\mathbf{1 6}$ to $\mathbf{4 0} \mathrm{mm}$ | $\mathbf{3 2}$ to $\mathbf{8 0} \mathrm{mm}$ |

## MHF2 Series

## Compact

## Height: 66\% reduction

$72.8 \mathrm{~mm} \Rightarrow 25 \mathrm{~mm}$ (Comparison between the MHF2 (ه12) and the MHZ2 (ө20))

| [mm] |  |
| :---: | :---: |
| Bore size | Height |
| 8 | 19 |
| 12 | 25 |
| 16 | 33 |
| 20 | 41 |

MHF2-12D

MHZ2-20D3

- Space-saving low-profile design
- Reduced moment generation
- Improved accuracy with smooth operation

- Reduced bending moment
- Reduced vibration

## Stroke selection is available.

3 standard stroke lengths are available for each bore size.
The stroke can be selected according to the workpiece.

## Actuator Position Sensor Compatible Type

## Made to Order -X7050 p. 35,36

- The stroke position is output with an analog signal.
- Repeatability: 0.1 mm
- Direct mounting is possible.

## High degree of mounting flexibility

As no brackets are required, the mounting height can be

## Strong gripping force

The double piston construction allows for a compact design with strong gripping force.

| Model | Bore size | Gripping force [N] |

# MHF2 Series <br> Model Selection 

## Model Selection

## Selection Procedure

Step 1 Check the effective gripping force. $\rightarrow$ Step 2 Check the gripping point. $\rightarrow$ Step 3 Check the external force on fingers.

Step 1 Check the gripping force.

## Model Selection Illustration

"Gripping force at least 10 to 20 times greater than the workpiece weight"
"At least 10 to 20 times greater than the workpiece weight" recommended by SMC is calculated with a margin of "a" $=4$, which allows for impacts that occur during normal transportation, etc.
$\left.\begin{array}{|c|c|}\hline \text { When } \mu=0.2 & \text { When } \mu=0.1 \\ \hline F=\frac{\mathrm{mg}}{2 \times 0.2} \times 4 \\ =10 \times \mathrm{mg}\end{array} \quad \begin{array}{r}\mathrm{F}=\frac{\mathrm{mg}}{2 \times 0.1} \mathrm{~m} \times 4 \\ =20 \times \mathrm{mg}\end{array}\right]$

When gripping a workpiece as in the figure to the left, and with the following definitions,
F: Gripping force [ N ]
$\mu$ : Coefficient of friction between the
attachments and the workpiece
m: Workpiece mass [kg]
g: Gravitational acceleration $\left(=9.8 \mathrm{~m} / \mathrm{s}^{2}\right)$
mg: Workpiece weight [ N ]
the conditions under which the workpiece will not drop are
$\mathbf{2} \times \mu \mathrm{F}>\mathrm{mg}$
$\stackrel{1}{4}$
Number of fingers
and therefore,

$$
\mathbf{F}>\frac{\mathbf{m g}}{\mathbf{2 \times \mu}}
$$

With "a" representing the margin,
" $F$ " is determined by the following formula:

$$
\mathbf{F}=\frac{\mathbf{m g}}{2 \mathbf{x} \mu} \times \mathbf{a}
$$

* • Even in cases where the coefficient of friction is greater than $\mu=0.2$, for reasons of safety, select a gripping force which is at least 10 to 20 times greater than the workpiece weight, as recommended by SMC.
- If high acceleration, or impact forces are encountered during motion, a further margin should be considered.

Step 1 Check the effective gripping force: MHF2 Series

- Indication of effective gripping force The gripping force shown in the graphs below represents the gripping force of one finger when all fingers and attachments are in contact with the workpiece.
$\mathrm{F}=$ One finger thrust
- Both the external and internal gripping forces are the values shown in the graphs below.

## External gripping state

## Internal gripping state

## MHF2-8D $\square$

MHF2-16D $\square$

MHF2-12D $\square$

MHF2-20D $\square$

## MHF2 Series

Model Selection
Step 2 Check the gripping point: MHF2 Series

External gripping state

Internal gripping state

- The air gripper should be operated so that the workpiece gripping point " $\llcorner$ " and the amount of overhang "H" stay within the range shown for each operating pressure given in the graphs below.
- If the workpiece gripping point goes beyond the range limits, this will have an adverse effect on the life of the air gripper.

## MHF2-8D $\square$

## MHF2-16D $\square$

MHF2-12D $\square$

MHF2-20D $\square$

## Step 3 Check the external force on fingers: MHF2 Series

L: Distance to the point at which the load is applied [mm]

| Model | Allowable vertical <br> load <br> Fv [N] | Max. allowable moment |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Pitch moment <br> Mp [N•m] | Yaw moment <br> My [N•m] | Roll moment <br> Mr [N•m] |
| MHF2-8D $\square$ | 58 | 0.26 | 0.26 | 0.53 |
| MHF2-12D $\square$ | 98 | 0.68 | 0.68 | 1.4 |
| MHF2-16D $\square$ | 176 | 1.4 | 1.4 | 2.8 |
| MHF2-20D $\square$ | 294 | 2 | 2 | 4 |

* The load and moment values in the table indicate static values.

| Calculation of allowable external force (when moment load is applied) | Calculation example |
| :---: | :---: |
| $\begin{aligned} \text { Allowable load } \mathrm{F}[\mathrm{~N}] & =\frac{M(\text { Max. allowable moment })[\mathrm{N} \cdot \mathrm{~m}]}{\mathrm{L} \times \underline{10^{-3 * 1}}} \\ & (* 1 \text { Constant for unit conversion }) \end{aligned}$ | When a load $f=10 \mathrm{~N}$ is operating, which applies pitch moment to point $L=30 \mathrm{~mm}$ from the end of the MHF2-12D finger. $\begin{aligned} & \text { Allowable load } F=\frac{0.68}{30 \times 10^{-3}} \\ &=22.7[\mathrm{~N}] \\ & \text { Load } f=10[\mathrm{~N}]<22.7[\mathrm{~N}] \end{aligned}$ <br> Therefore, it can be used. |

# Low Profile Air Gripper MHF2 Series ø8, ø12, ø16, ø20

## Moisture Control Tube

IDK Series
When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions. Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the IDK series in the Web Catalog.

## MHF2 Series

Construction
MHF2-8D, MHF2-8D1

## MHF2-8D2

## MHF2 Series

## Auto Switch Installation Examples and Mounting Positions

Various auto switch applications are possible through different combinations of auto switch quantities and detecting positions.

## 1) Detection when Gripping Exterior of a Workpiece

[^2]
## MHF2 Series

## Auto Switch Installation Examples and Mounting Positions

Various auto switch applications are possible through different combinations of auto switch quantities and detecting positions.

## 2) Internal Gripping

[^3]- When holding a workpiece close at the end of opening/closing stroke of fingers, detecting performance of the combinations listed in the table above may be limited, depending on the hysteresis of an auto switch, etc.

## Auto Switch Hysteresis

Auto switches have hysteresis similar to micro switches.
Use the table below as a guide when adjusting auto switch positions, etc.

Hysteresis

|  | D-M9 $\square(\mathbf{V})$ <br> D-M9 $\square \mathbf{W}(\mathbf{V})$ <br> D-M9 $\square \mathbf{A ( V ) ~}$ |
| :--- | :---: |
| MHF2-8D $\square$ | 0.2 |
| MHF2-12D $\square$ | 0.3 |
| MHF2-16D $\square$ | 0.2 |
| MHF2-20D $\square$ | 0.5 |

## Auto Switch Mounting

To set the auto switch, insert the auto switch into the auto switch mounting groove of the gripper from the direction as shown in the illustration below. After setting the position, tighten the attached auto switch mounting screw with a flat blade watchmaker's screwdriver.

* Use a watchmaker's screwdriver with a grip diameter of 5 to 6 mm to tighten the auto switch mounting screw.
Also, tighten with a torque of about 0.05 to $0.15 \mathrm{~N} \cdot \mathrm{~m}$, or about 0.05 to $0.10 \mathrm{~N} \cdot \mathrm{~m}$ for $\mathrm{D}-\mathrm{M} 9 \square \mathrm{~A}(\mathrm{~V})$

## $\triangle$ Caution

When using an auto switch on the mounting plate side, the switch will protrude from the end face as shown in the right figure. Please provide a run off space of 2 mm or more on the mounting plate.

## Protrusion of Auto Switch from Edge of Body

- The amount of auto switch protrusion from the body end surface is shown in the table below.
- Use this as a standard when mounting, etc.

Protrusion of Auto Switch

|  |  | In-line entry |  | Perpendicular entry |  |

# Prior to Use <br> Auto Switch Connections and Examples 

## Sink Input Specifications

3-wire, NPN

## 2-wire

## Source Input Specifications

3-wire, PNP

2-wire

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

## Examples of AND (Series) and OR (Parallel) Connections

* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid. Depending on the operating environment, the product may not operate properly.

## 3-wire AND connection for NPN output

(Using relays)

3-wire AND connection for PNP output (Using relays)

## 2-wire AND connection

(Performed with auto switches only)

(Performed with auto switches only)

## 2-wire OR connection

3-wire OR connection for NPN output

3-wire OR connection for PNP output

Example) Load voltage at ON
Power supply voltage: 24 VDC Internal voltage drop: 4 V

$$
\begin{aligned}
& \text { Internal voltage drop } \times 2 \text { pcs. } \\
= & 24 \mathrm{~V}-4 \mathrm{~V} \times 2 \text { pcs. } \\
= & 16 \mathrm{~V}
\end{aligned}
$$

Example) Load voltage at OFF Leakage current: 1 mA
Load impedance: $3 \mathrm{k} \Omega$
Load voltage at OFF = Leakage current x 2 pcs. x
Load impedance
$=1 \mathrm{~mA} \times 2$ pcs. $\times 3 \mathrm{k} \Omega$
$=6 \mathrm{~V}$

Load voltage at $\mathrm{ON}=$ Power supply voltage -
if using AND connection for a if using AND connection for a
heat-resistant solid state auto if using AND connection for a
heat-resistant solid state auto switch or a trimmer switch.
When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state. The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with a load voltage less than 20 V cannot be used. Please contact SMC
(Solid state) When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.
(Reed)
Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

## MHF2 Series <br> Made to Order

1 -X4 Heat Resistant ( -10 to $100^{\circ} \mathrm{C}$ ) ..... p. 29
2 -X5 Fluororubber Seal ..... p. 29
3 -X50 Without Magnet ..... p. 29
4 -X53 Ethylene Propylene Rubber Seal (EPDM) ..... p. 30
5 -X63 Fluorine Grease ..... p. 30
6 -X79 Grease for Food Processing Machines: Fluorine Grease ..... p. 30
7 -X79A Grease for Food Processing Machines:
Aluminum Complex Soap Base Grease ..... p. 31
8 -X81 $\square$ Anti-corrosive Treatment of Finger ..... p. 31-X81A (Special black chromium treatment is made on only the finger.)-X81B (Special black chromium treatment is made on the finger and guide.)
9 -X83 With An Adjustable Opening/Closing Finger Positioning ..... p. 32
10 -X7050 Actuator Position Sensor Compatible Type ..... p. 35

## MHF2 Series

1 Heat Resistant (-10 to $100^{\circ} \mathrm{C}$ )
Seal material and grease have been changed so that the product can be used at temperatures between -10 up to $100^{\circ} \mathrm{C}$.

## How to Order

| Standard model no. |
| :---: |
| Heat resistant ${ }^{-1}$ X4 |

Specifications

| Ambient temperature range | $-10^{\circ} \mathrm{C}$ to $100^{\circ} \mathrm{C}$ (No freezing) |
| :--- | :---: |
| Seal material | Fluororubber |
| Grease | Heat-resistant grease (GR-F) |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

## $\triangle$ Warning

## Precautions

Be aware that smoking cigarettes after your hands have come into contact with the grease used for this product can create a gas that is hazardous to humans.

* Magnet is built-in, but when using an auto switch, the acceptable temperature range becomes -10 to $60^{\circ} \mathrm{C}$.
* For lubrication, specialized grease GR-F is recommended.

## Replacement Parts: Seal Kit

| Seal kit part number |
| :---: |
| MHF $\square$-PS-X4 |
| (MHF8-PS-2-X4 for the MHF2-8D2-X4) |

* Enter the cylinder bore size into $\square \square$ of the seal kit part number.

Refer to pages 9 and 10 for the replacement parts.

* The seal kit does not include a grease pack. Order it separately. Grease pack part number: GR-F-005 (5 g)

## How to Order

Please contact SMC, since the type of chemical and the operating temperature may not allow the use of this product.

* Since the standard type magnet is built-in, please contact SMC for the product's adaptability to the operating environment.

## Specifications

| Seal material | Fluororubber |
| :--- | :---: |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

## How to Order

## Specifications

| Magnet | None |
| :--- | :---: |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

# Made to Order MHF2 Series 

4 Ethylene Propylene Rubber Seal (EPDM)
Seal material has been changed to ethylene propylene (EPDM), and grease to fluorine grease.

How to Order

Specifications

| Seal material | Ethylene propylene rubber (EPDM) |
| :--- | :---: |
| Grease | Fluorine grease (GR-F) |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

* For lubrication, specialized grease GR-F is recommended. Grease pack part number: GR-F-005 (5 g)

## $\triangle$ Warning

 PrecautionsBe aware that smoking cigarettes after your hands have come into contact with the grease used for this product can create a gas that is hazardous to humans.

## How to Order

* For lubrication, specialized grease GR-F is recommended. Grease pack part number: GR-F-005 (5 g)

## Specifications

## © Warning

Precautions
Be aware that smoking cigarettes after your hands have come into contact with the grease used for this product can create a gas that is hazardous to humans.

| Grease | Fluorine grease (GR-F) |
| :--- | :---: |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

## 6 Grease for Food Processing Machines: Fluorine Grease

Use grease for food processing machines (NSF-H1 certified/fluorine grease).

## How to Order

## © Warning

## Precautions

Be aware that smoking cigarettes after your hands have come into contact with the grease used for this product can create a gas that is hazardous to humans.

## $\triangle$ Caution

Do not use air grippers in a food-related environment.
<Not installable>

Food zone ............ | Food may directly contact with air grippers, |
| :--- |
| and is treated as food products. |

| <Installable> |
| :--- |
| Splash zone ......... Food may directly contact with air grippers, |
| but is not treated as food products. |

Non-food zone ..... Air grippers do not directly contact food.

* For lubrication, specialized grease GR-H is recommended.

Grease pack part number: GR-H-010 (10 g)

## Specifications

| Grease | Grease for food processing machines <br> (NSF-H1 certified)/Fluorine grease |
| :--- | :---: |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

* If the fluorine grease is not applicable to the working environment, use "-X79A."

## MHF2 Series

## 7 Grease for Food Processing Machines: Aluminum Complex Soap Base Grease

Use grease for food processing machines (NSF-H1 certified).

## How to Order

## $\triangle$ Caution

Do not use air grippers in a food-related environment.
<Not installable>
Food zone ............ Food may directly contact with air grippers,
and is treated as food products.

* For lubrication, specialized grease GR-R is recommended. Grease pack part number: GR-R-010 (10 g)

## Specifications

| Grease | Grease for food processing machines (NSF-H1 <br> certified)/Aluminum complex soap base grease |
| :--- | :---: |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

## 8 Anti-corrosive Treatment of Finger

- Special black chromium treatment
- The finger and guide use the martensitic stainless steel. When anti-corrosive measures better than the martensitic stainless steel level are required, use these series.

## How to Order

## Specifications

| Treatment | Special black chromium treatment |
| :--- | :---: |
| Specifications other than <br> the above and dimensions | Same as those of the standard type |

# Made to Order MHF2 Series 

9 With An Adjustable Opening/Closing Finger Positioning

- Stroke can be adjusted to suit the workpiece
-3 types of opening/closing finger stroke adjustments (Adjustable finger opening/closing position type, Adjustable finger opening position type, Adjustable finger closed position type)

## Various strokes

- Standardized 3 stroke types and 2 stroke adjustment types for fine tuning

| Bore size [mm] | Short stroke |  | Medium stroke |  | Long stroke |  |

* Specifications and details other than those shown above are the same as those of the standard type.

## How to Adjust Finger Stroke

After adjusting the opening/closing width adjustment thread, tighten the nut to fix.

Nut Tightening Torque

| Part no. | Thread size | Tightening torque [ $\mathrm{N} \cdot \mathrm{m}$ ] |
| :---: | :---: | :---: |
| MHF2-8D $\square$-X83 $\square \square$ | M4 x 0.7 | 1.5 |
| MHF2-8D $\square$ R-X83 $\square \square$ |  |  |
| MHF2-12D $\square$-X83 $\square \square$ | M5 x 0.8 | 3.0 |
| MHF2-12D $\square$ R-X83 $\square \square$ |  |  |
| MHF2-16D $\square$-X83 $\square \square$ | M6 x 1.0 | 5.2 |
| MHF2-16D $\square$ R-X83 $\square \square$ |  |  |
| MHF2-20D $\square$-X83 $\square \square$ | M8 x 1.25 | 12.5 |
| MHF2-20D $\square$ R-X83 $\square \square$ |  |  |

## $\triangle$ Warning

1. Adjust the stroke adjustment screw within the adjustable width.

If you adjust the adjustment screw beyond the maximum value, the adjustment screw may fall out and may cause damage to human bodies or equipment/devices.
2. Do not adjust stroke when air pressure is applied to the adjustment screw side.
If air pressure is applied to the adjustment screw, the adjustment screw may fall out in some adjustment statuses. When applying pressure, make sure the adjustment screw is tightened enough.

## 9 with An Adjustable Opening／Closing Finger Positioning

Dimensions（The dimensions below are the same as those of the standard type．）

## MHF2 Series

- The stroke position is output with an analog signal.
- Repeatability: 0.1 mm
- Direct mounting is possible.
- Analog output, Switch output

## Applicable Actuator Position Sensors (Full stroke length detectable)

| Stroke | Bore size |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | ø8 | ø12 | ø16 | $\varnothing 20$ |
| Short stroke | Not available | D-MP025 $\square$ | D-MP025 $\square$ | D-MP025 $\square$ |
| Medium stroke | D-MP025 $\square$ | D-MP025 $\square$ | D-MP025 $\square$ | D-MP025 $\square$ |
| Long stroke | D-MP025 $\square$ | D-MP050 $\square$ | D-MP050 $\square$ | D-MP050 $\square$ |

## Specifications: Same as those of the standard type

How to Order

* The short stroke type cannot be used for the ø8 because the mounting dimension is too short.
* The actuator position sensor is not included with the product. It must be ordered separately.
* D-M9 series auto switches cannot be used.
* For details on the actuator position sensor (D-MP series), refer to the Web Catalog.

## 10 Actuator Position Sensor Compatible Type

## Actuator Position Sensor Mounting Position (Guide)

This is a guideline for the mounting position when detecting the full stroke length.

* Adjust the sensor after confirming the operating conditions in the actual setting

When the sensor is mounted upward

When the sensor is mounted downward

Name plate or R port surface

Actuator Position Sensor Mounting Position Guide

| Model | A | (B) | (C) | D | Applicable actuator position sensor |
| :---: | :---: | :---: | :---: | :---: | :---: |
| MHF2-8D1(R)-X7050 | 5.5 to 7.5 | (15) | (8.5) | 0 to 1 | D-MP025 $\square$ |
| MHF2-8D2(R)-X7050 | 26.5 to 31.5 | (15) | (8.5) | 0 to 3.5 |  |
| MHF2-12D(R)-X7050 | 6 to 11.5 | (15) | (8) | 0 to 4 |  |
| MHF2-12D1(R)-X7050 | 19.5 to 27.5 | (15) | (8) | 0 to 6.5 |  |
| MHF2-12D2(R)-X7050 | 24 to 39 | (15) | (8) | 0 to 14 | D-MP050 $\square$ |
| MHF2-16D(R)-X7050 | 19 to 31.5 | (14) | (7) | 0 to 11 | D-MP025 $\square$ |
| MHF2-16D1(R)-X7050 | 36 to 44.5 | (14) | (7) | 0 to 13.5 |  |
| MHF2-16D2(R)-X7050 | 56 to 71 | (14) | (7) | 5.5 to 20.5 | D-MP050 $\square$ |
| MHF2-20D(R)-X7050 | 31 to 43 | (14) | (5.5) | 1 to 13 | D-MP025 $\square$ |
| MHF2-20D1(R)-X7050 | 54 to 56 | (14) | (5.5) | 15.5 to 17.5 |  |
| MHF2-20D2(R)-X7050 | 80 to 87 | (14) | (5.5) | 22 to 29 | D-MP050 $\square$ |

* The $\square$ in the applicable actuator position sensor part numbers indicates the lead wire type. For details, refer to the actuator position sensor in the Web Catalog.

## For the Side Piping Type

When the sensor is mounted on the same surface as the piping port on the side piping type, there will be interference between the sensor and the fitting and the speed controller, resulting in restricted use.

| Model | Sensor: Upward | Sensor: Downward |
| :--- | :---: | :---: |

## MHF2 Series

Specific Product Precautions 1
Be sure to read this before handling the products. Refer to the back cover for safety instructions. For air gripper and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website.

## Mounting

## © Warning

1. Do not scratch or dent the air gripper by dropping or bumping it when mounting.
Even a slight deformation can cause inaccuracy or malfunction.
2. Tighten the screw within the specified torque range when mounting the attachment.
Tightening with a torque above the limit can cause malfunction, while insufficient tightening can cause slippage and dropping.

## How to Mount Attachment to the Finger

Make sure to mount the attachments on fingers with the tightening torque in the table below by using bolts, etc., for the female threads on fingers.

* Refer to the next page for how to locate the finger and attachment.

| Model | Bolt | Max. tightening torque [N•m] |
| :---: | :---: | :---: |
| MHF2-8D $\square$ | M2.5 $\times 0.45$ | 0.36 |
| MHF2-12D $\square$ | M3 $\times 0.5$ | 0.63 |
| MHF2-16D $\square$ | M4 $\times 0.7$ | 1.5 |
| MHF2-20D $\square$ | M4 $\times 0.7$ | 1.5 |

3. Tighten the screw within the specified torque range when mounting the air gripper.
Tightening with a torque above the limit can cause malfunction, while insufficient tightening can cause slippage and dropping.

## How to Mount Air Grippers

Top mounting (Body tapped)

| Model | Bolt | Max. tightening <br> torque $[\mathrm{N} \cdot \mathrm{m}]$ | Max. screw-in <br> depth $\mathrm{L}[\mathrm{mm}]$ |
| :---: | :---: | :---: | :---: |
| MHF2-8D | $\mathrm{M} 3 \times 0.5$ | 0.95 | 7 |
| MHF2-12D | $\mathrm{M} 4 \times 0.7$ | 2.2 | 10 |
| MHF2-16D | $\mathrm{M} 5 \times 0.8$ | 4.5 | 12 |
| MHF2-20D | $\mathrm{M} 6 \times 1$ | 7.8 | 15 |

Lateral mounting (Body tapped)

| Model | Bolt | Max. tightening <br> torque $[\mathrm{N} \cdot \mathrm{m}]$ | Max. screw-in <br> depth $\mathrm{L}[\mathrm{mm}]$ |
| :---: | :---: | :---: | :---: |
| MHF2-8D | $\mathrm{M} 3 \times 0.5$ | 0.63 | 4 |
| MHF2-12D | $\mathrm{M} 4 \times 0.7$ | 1.5 | 5 |
| MHF2-16D | $\mathrm{M} 5 \times 0.8$ | 3 | 5.5 |
| MHF2-20D | $\mathrm{M} 6 \times 1$ | 5.2 | 6 |

Bottom mounting (Body tapped, body through-hole) - Body tapped

| Model | Bolt | Max. tightening <br> torque $[\mathrm{N} \cdot \mathrm{m}]$ | Max. screw-in <br> depth $\mathrm{L}[\mathrm{mm}]$ |
| :---: | :---: | :---: | :---: |
| MHF2-8D | M3 $\times 0.5$ | 0.63 | 4 |
| MHF2-12D | M4 $\times 0.7$ | 1.5 | 5 |
| MHF2-16D | M5 $\times 0.8$ | 3 | 5.5 |
| MHF2-20D | M6 $\times 1$ | 5.2 | 6 |

- Body through-hole

| Model | Bolt | Max. tightening <br> torque $[\mathrm{N} \cdot \mathrm{m}]$ | Screw-in depth <br> $\mathrm{L}[\mathrm{mm}]$ |
| :---: | :---: | :---: | :---: |
| MHF2-8D | M2.5 $\times 0.45^{* 1}$ | 0.36 | 4 |
| MHF2-12D | M3 $\times 0.5^{* 1}$ | 0.63 | 5.2 |
| MHF2-16D | $\mathrm{M} 4 \times 0.7$ | 1.5 | - |
| MHF2-20D | M5 $\times 0.8$ | 3 | - |

*1 When MHF2-8D $\square$ and MHF2-12D $\square$ are mounted body through-hole, use the attached special bolts.

## Operating Environment

## $\triangle$ Caution

## Use caution for the anti-corrosiveness of the linear guide unit.

Martensitic stainless steel is used for the finger guide rail. However, the anti-corrosiveness of this steel is inferior to that of austenitic stainless steel. In particular, rust may be generated in environments where water droplets are likely to adhere due to condensation, etc.

## MHF2 Series <br> Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For air gripper and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website.

## Handling

## $\triangle$ Caution

How to Locate Finger and Attachment

## - Positioning in the finger's open/close direction

Position the finger and the attachment by inserting the finger's pin into the attachment's pin insertion hole.
Provide the following pin insertion hole dimensions: shaft-basis fitting dimension $\mathbf{C}$ for the open/close direction; slotted hole with relief $\mathbf{B}$ for the cross direction.
Positioning in the finger's cross direction
Perform the positioning from the reference plane of the finger and the side A of the attachment.

Finite orbit type guide is used in the actuator finger part. By using this, when there are inertial force which cause by movements or rotation to the actuator, steel ball will move to one side and this will cause a large resistance and degrade the accuracy. When there are inertial force which cause by movements or rotation to the actuator, operate the finger to full stroke.
Especially in long stroke type, the accuracy of the finger may degrade.

Safety Instructions
These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

Caution indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.
Danger: Danger indicates a hazard with a high hevelof fisk which

## $\triangle$ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.
Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.
2. Only personnel with appropriate training should operate machinery and equipment.
The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.
3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
4. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
5. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully
6. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
7. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.
8. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
9. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
10. An application which could have negative effects on people, property, or animals requiring special safety analysis.
11. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.
*1) ISO 4414: Pneumatic fluid power - General rules relating to systems.
ISO 4413: Hydraulic fluid power - General rules relating to systems.
IEC 60204-1: Safety of machinery - Electrical equipment of machines. (Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots - Safety.
etc.

## $\triangle$ Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

## Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements"
Read and accept them before using the product.

## Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first. ${ }^{* 2)}$
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
*2) Vacuum pads are excluded from this 1 year warranty.
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

## Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

## $\triangle$ Caution

SMC products are not intended for use as instruments for legal metrology.
Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

[^0]:    *1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance.
    *2 Lead wire length symbols: $0.5 \mathrm{~m} \ldots \ldots . . . . . . .$. Nil (Example) M9NW . * Solid state auto switches marked with a "○" are produced upon receipt

    | $1 \mathrm{~m} \ldots \ldots \ldots \ldots . \mathrm{M}$ | (Example) M9NWM <br> $3 \mathrm{~m} \ldots \ldots \ldots \ldots \mathrm{~L}$ <br> $5 \mathrm{~m} \ldots \ldots \ldots \ldots . \mathrm{Z}$ |
