

Compact Cylinder

ø12, ø16, ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

RoHS

Compact

New An *axial foot type* and a *flange type* have been added. (ø32 to ø100)

Overall length shortened

Width shortened

JCQ ø20

6.5 mm

JCQ ø20

6 mm

Existing model ø20 (CDQS series)

Existing model ø20 (CDQS series)

Height shortened

4 mm

JCQ ø20

Max. **Weight 46% lighter**

382 g → 204 g
(Compared with the existing CDQ2 series, ø32, 10 mm stroke, flange mounting)

JCQ Series

Lightweight and compact

Weight comparison using a single cylinder unit

(Compared with the existing model) [mm]

Bore size	CDQS/CDQ2		JCDQ
∅12	Weight 43 g 	33% weight reduction 24% volume reduction	Weight 29 g
∅16	Weight 57 g 	35% weight reduction 23% volume reduction	Weight 37 g
∅20	Weight 106 g 	42% weight reduction 40% volume reduction	Weight 61 g
∅25	Weight 150 g 	45% weight reduction 40% volume reduction	Weight 82 g
*1 ∅32	Weight 202 g 	33% weight reduction 35% volume reduction	Weight 135 g

How to Order

Without auto switch **JCQ** **12** - **30** - -

With auto switch **JCDQ** **12** - **30** - **L** - **M9BW** -

With magnet for auto switch •

Mounting •

Nil	Through-hole (Standard)	ø12 to ø100
A	Both ends tapped	
L	Axial foot	ø32 to ø100
F	Rod flange	
G	Head flange	

* For the cylinder for the axial foot type or the rod flange type mounting bracket, the cylinder rod protrusion dimensions (Dimensions L and L₁) vary from those of the standard cylinder. When ordering only the cylinder, refer to the cylinder for the foot type or the rod flange type mounting bracket (-XC103) on page 14.

Bore size •

12	12 mm
16	16 mm
20	20 mm
25	25 mm
32	32 mm
40	40 mm
50	50 mm
63	63 mm
80	80 mm
100	100 mm

Port thread type •

Nil	M thread	ø12 to ø40
	Rc	
TN	NPT	ø50 to ø100
TF	G	

Made to order
(For details, refer to page 4.)

Number of auto switches

Nil	2
S	1
n	n

Auto switch

Nil	Without auto switch
-----	---------------------

* For applicable auto switches, refer to the table below.

Mounting bolt

Nil	None
L	Shipped with the product

* A mounting bolt is shipped with the product only when the mounting symbol is Nil (through-hole).
* For details on mounting bolt sizes, refer to page 7.
* The mounting bolt is shipped with the product.

Cylinder stroke [mm]
Refer to page 4 for standard strokes.

Applicable Auto Switches/Refer to the Web Catalog for further information on auto switches.

*1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance. Please contact SMC regarding water-resistant types with the above model numbers.

* Lead wire length symbols: 0.5 m.....Nil (Example) M9NW
1 m.....M (Example) M9NWM
3 m.....L (Example) M9NWL
5 m.....Z (Example) M9NWL

* Solid state auto switches marked with a "○" are produced upon receipt of order.

* For details on auto switches with pre-wired connectors, refer to the Web Catalog.

* Auto switches are shipped together with the product but do not come assembled.

Compact Cylinder **JCQ Series**

Double Acting, Single Rod

Symbol

Rubber bumper

Made to Order
(For details, refer to page 14.)

-XC103 Cylinder for the foot type or the rod flange type mounting bracket

Specifications

Bore size [mm]	12	16	20	25	32	40	50	63	80	100
Action	Double acting, Single rod									
Fluid	Air									
Proof pressure	1.0 MPa									
Max. operating pressure	0.7 MPa*2									
Min. operating pressure	0.07 MPa		0.05 MPa							
Ambient and fluid temperatures	5 to 60°C									
Lubrication	Not required (Non-lube)									
Piston speed*3	50 to 500 mm/s*2					50 to 300 mm/s*2				
Cushion	Rubber bumper									
Allowable kinetic energy [J]	0.022	0.038	0.055	0.09	0.15	0.26	0.46	0.77	1.36	2.27
Rod end thread	Female thread									
Stroke length tolerance	+1.3 mm*1 0									

*1 Stroke length tolerance does not include the deflection of the bumper.

*2 Max. operating pressure and piston speed are different from those of the existing model (CQ2 series).

*3 Depending on the system configuration selected, the specified speed may not be satisfied.

Standard Strokes

* When using with auto switches, refer to the Minimum Stroke for Auto Switch Mounting table on page 12.

Bore size [mm]	Standard stroke [mm]
12, 16	5, 10, 15, 20, 25, 30
20, 25, 32, 40	5, 10, 15, 20, 25, 30, 35, 40, 45, 50
50, 63, 80, 100	10, 15, 20, 25, 30, 35, 40, 45, 50

* Intermediate strokes are available as a special order.

Mounting Brackets/Part Nos.

Mounting bracket	Min. order quantity	Bore size [mm]						Contents

Minimum Stroke for Auto Switch Mounting

Number of auto switches	[mm]			
	D-M9□V	D-M9□WV D-M9□AV	D-M9□	D-M9□W D-M9□A
1	5	10	15 (5)	15 (10)
2	5	15	15 (5)	15

* The dimension stated in () shows the minimum stroke for the auto switch mounting when the auto switch does not project from the end surface of the cylinder body and hinder the lead wire bending space. (Refer to the figure below.) The auto switch needs to be ordered separately.

Operating Range

Auto switch model	[mm]									
	Bore size									
	12	16	20	25	32	40	50	63	80	100
D-M9□(V) D-M9□W(V) D-M9□A(V)*1	3	3	4.5	4.5	4	4.5	5.5	6	6	6.5

*1 Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately ±30% dispersion) and may change substantially depending on the ambient environment.

Auto Switch Mounting

Applicable auto switch	D-M9□/M9□V D-M9□W/M9□WV D-M9□A/M9□AV		
	Bore size [mm]	φ12	φ16
Surfaces with auto switch mounting slot			

* Auto switch mounting bracket and auto switch are enclosed with the cylinder for shipment. For an environment that needs the water resistant auto switch, select the D-M9□A(V) type.

Mounting of auto switch

• When tightening the auto switch mounting screw, use a watchmakers' screwdriver with a handle 5 to 6 mm in diameter.

Tightening Torque for Auto Switch Mounting Screw [N·m]

Auto switch model	Tightening torque
D-M9□(V) D-M9□W(V) D-M9□A(V)	0.05 to 0.15

Prior to Use

Auto Switch Connections and Examples

Sink Input Specifications

3-wire, NPN

2-wire

Source Input Specifications

3-wire, PNP

2-wire

Connect according to the applicable PLC input specifications, as the connection method will vary depending on the PLC input specifications.

Examples of AND (Series) and OR (Parallel) Connections

* When using solid state auto switches, ensure the application is set up so the signals for the first 50 ms are invalid. Depending on the operating environment, the product may not operate properly.

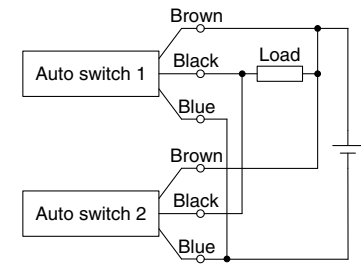

3-wire AND connection for NPN output (Using relays)

(Performed with auto switches only)

3-wire OR connection for NPN output

3-wire AND connection for PNP output (Using relays)

(Performed with auto switches only)

3-wire OR connection for PNP output

2-wire AND connection

When two auto switches are connected in series, a load may malfunction because the load voltage will decline when in the ON state. The indicator lights will light up when both of the auto switches are in the ON state. Auto switches with a load voltage less than 20 V cannot be used. Please contact SMC if using AND connection for a heat-resistant solid state auto switch or a trimmer switch.

Example) Load voltage at ON
 Power supply voltage: 24 VDC
 Internal voltage drop: 4 V
 Load voltage at ON = Power supply voltage –
 Internal voltage drop x 2 pcs.
 = 24 V – 4 V x 2 pcs.
 = 16 V

2-wire OR connection

(Solid state)
 When two auto switches are connected in parallel, malfunction may occur because the load voltage will increase when in the OFF state.

(Reed)
 Because there is no current leakage, the load voltage will not increase when turned OFF. However, depending on the number of auto switches in the ON state, the indicator lights may sometimes grow dim or not light up, due to the dispersion and reduction of the current flowing to the auto switches.

Example) Load voltage at OFF
 Leakage current: 1 mA
 Load impedance: 3 kΩ
 Load voltage at OFF = Leakage current x 2 pcs. x
 Load impedance
 = 1 mA x 2 pcs. x 3 kΩ
 = 6 V

Specific Product Precautions 1

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to “Handling Precautions for SMC Products” and the “Operation Manual” on SMC website: <https://www.smcworld.com>

Mounting

Caution

Compact cylinders are designed to reduce the size of mechanical equipment and promote space saving. Thus, if they are used in the same manner as conventional cylinders, such as tie-rod cylinders, they may experience reduced performance. Pay sufficient attention to the operating conditions when using.

1. Allowable lateral load

The lateral load that can be applied to the piston rod end is limited. If a cylinder is used with a lateral load over the limit, air leakage due to abnormal friction on the seals, the galling of cylinder tubes and pistons, or abnormal friction on the bearing part may result. The lateral load applied to the piston rod must be within the allowable range indicated in this catalog. When the load exceeds the limit, install a guide or change the bore size to suit the load in order to make the load within the allowable range.

2. Workpiece connection

When a workpiece is mounted on the piston rod end, connect them by aligning the center of the piston rod with the center of the workpiece. If they are off-center, lateral load is generated and the phenomena mentioned in (1) may occur. In order to prevent the application of an off-center load, the use of a floating joint or a simple joint is recommended.

3. Tighten the mounting bracket within the recommended tightening torque range.

When mounting the bracket, tighten the mounting bolt within the recommended tightening torque range shown in the table below.

Bore size [mm]	Tightening torque [N·m]
32, 40	3.0 to 5.1
50, 63	9.0 to 12.0
80, 100	25.0 to 44.9

4. Simultaneous use of multiple cylinders

It is difficult to control the speed of pneumatic cylinders. The following conditions cause speed change: change in the supply pressure, load, temperature, or lubrication, differences in cylinder capabilities, the deterioration of various parts over time, etc. A speed controller can be used to control the speed of multiple cylinders simultaneously for a short period of time, but depending on the conditions, it may not work as desired. If multiple cylinders cannot operate simultaneously, unreasonable force will be applied to the piston rod because the cylinder positions may not be the same. This may cause abnormal friction on the seals and bearings and the galling of cylinder tubes and pistons. Do not use in applications where only the speed is adjusted to operate several cylinders simultaneously. If this is inevitable, use a high-rigidity guide for the load so that the cylinder is not damaged even when the output of each cylinder is slightly different.

5. Depending on the system configuration selected, the specified speed may not be satisfied.

Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to “Handling Precautions for SMC Products” and the “Operation Manual” on SMC website: <https://www.smcworld.com>

Mounting Fittings and Speed Controllers (for $\varnothing 12$ to $\varnothing 32$)

Caution

Use the series models listed below when connecting speed controllers and fittings directly to cylinders.

- After tightening the fitting by hand, use a wrench to tighten the fitting an additional approximately 1/4 turn for a port size of M3 x 0.5 or 1/6 turn for a port size of M5 x 0.8. For elbow type fittings, tighten an additional 1/2 turn for a port size of M3 x 0.5 or 1/3 turn for a port size of M5 x 0.8 if gaskets are mounted in two places. If screws are tightened excessively, air leakage may result due to broken threads or a deformed gasket. If screws are tightened insufficiently, looseness and accompanying air leakage are likely to occur.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

*1) ISO 4414: Pneumatic fluid power – General rules relating to systems.
ISO 4413: Hydraulic fluid power – General rules relating to systems.
IEC 60204-1: Safety of machinery – Electrical equipment of machines.
(Part 1: General requirements)
ISO 10218-1: Manipulating industrial robots – Safety.
etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Contact SMC beforehand and take special consideration of safety measures if the product is to be used in any of the following conditions.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Installation on equipment in conjunction with atomic energy, railways, air navigation, space, shipping, vehicles, military, medical treatment, combustion and recreation, or equipment in contact with food and beverages, emergency stop circuits, clutch and brake circuits in press applications, safety equipment or other applications unsuitable for the standard specifications described in the product catalog.
3. An application which could have negative effects on people, property, or animals requiring special safety analysis.
4. Use in an interlock circuit, which requires the provision of double interlock for possible failure by using a mechanical protective function, and periodical checks to confirm proper operation.

Caution

1. The product is provided for use in manufacturing industries.

The product herein described is basically provided for peaceful use in manufacturing industries.
If considering using the product in other industries, consult SMC beforehand and exchange specifications or a contract if necessary.
If anything is unclear, contact your nearest sales branch.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Caution

SMC products are not intended for use as instruments for legal metrology.

Measurement instruments that SMC manufactures or sells have not been qualified by type approval tests relevant to the metrology (measurement) laws of each country. Therefore, SMC products cannot be used for business or certification ordained by the metrology (measurement) laws of each country.

Revision History

Edition B	* Bore sizes ø40, ø50, and ø63 have been added.	TR
Edition C	* Both ends tapped mounting has been added. * Bore sizes ø80 and ø100 have been added. * Port thread types NPT and G have been added.	UR
Edition D	* An axial foot type and a flange type have been added to mounting brackets. * Number of pages has been increased from 16 to 20.	ZT

Safety Instructions

Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
