

Clamp Cylinder

Series CK□1

- Clevis width **16.5 mm/19.5 mm**
- Built-in speed controller
- With air cushion
- Magnetic field resistant auto switches are mountable.

Magnetic field resistant auto switches are mountable.

[Series CKG1 / Built-in standard magnet]

- ... D-P3DWSC, D-P3DWSE, D-P3DW/L/Z (AC magnetic field)
- ... D-P4DWSC, D-P4DWSE, D-P4DWL/Z (AC magnetic field)

[Series CKP1 / Built-in strong magnet]

- ... D-P79WSE, D-P74L/Z (DC/AC magnetic fields)

The auto switch mounting and the piping position are available in three-way directions.

The auto switch mounting position can be altered.

Also, piping is possible in three-way directions regardless of the auto switch mounting position.

Clamp Cylinder with Magnetic Field Resistant Auto Switch (Rod Mounting Style)

Series CKG1/CKP1 ø40, ø50, ø63

Series CKG1/CKP1 clamp cylinder with magnetic field resistant auto switch (Rod mounting style) has been remodeled to shorten the overall length. When selecting this model, please consider the new CK□1 series.

Magnetic Field Resistant Auto Switch D-P4DW□□ Type / Band Mounting Compliant

Band mounting of the magnetic field resistant auto switch (D-P4DW□□ type) to the built-in standard magnet clamp cylinder (the CKG1□ series) is possible by ordering the switch mounting bracket and the auto switch individually.

⚠ Caution

Standard type auto switch is mountable for the built-in standard magnet type. For details, please refer to "Made to Order" on page 1331. Also, please note that the standard type auto switch cannot be used under the magnetic field resistant environment.

How to Order

Please order the switch mounting bracket, auto switch and built-in standard magnet clamp cylinder individually. Refer to the table below for auto switch mounting bracket part numbers.

Part no.	Applicable auto switch	Applicable clamp cylinder
BA8-040	D-P4DWSC	CKG1□40
BA8-050	D-P4DWSE	CKG1□50
BA8-063	D-P4DWLZ	CKG1□63

Ordering Example

- Example case ① Built-in standard magnet cylinder:
CKG1A50-50Y ... 1
- Example case ② Magnetic field resistant auto switch:
D-P4DWSC ... 2
- Example case ③ Switch mounting bracket:
BA8-050 ... 2

Note 1) Please order the same quantity for the switch mounting bracket and the magnetic field resistant auto switch respectively.

Note 2) Band mounting for the magnetic field resistant auto switch D-P79WS□ type, D-P74□ type is not applicable.

Applicable Magnetic Field Resistant Auto Switches

Applicable cylinder series	Type	Auto switch model	Applicable magnetic field	Electrical entry	Indicator light	Wiring (Pin no in use)	Load voltage	Lead wire length	Applicable load
Series CKG1	Solid state auto switch	P4DWSC	AC magnetic field (Single-phase AC welding magnetic field)	Pre-wired connector	2-color display	2-wire (3-4)	24 VDC	0.3 m	Relay, PLC Note 1)

Note) The CK□1B series (clevis width 19.5 mm) is not available with pedestal.

Auto Switch Proper Mounting Position (Detection at Stroke End) and Its Mounting Height

Rod mounting D-P3DW□□ type

D-P4DW□□ type

Note) The above drawing is the mounting example for the D-P4DWS□ type.

D-P7□□□□ type

Note) The above drawing is the mounting example for the D-P79WSE type.

Band mounting D-P4DW□□ type

Note) The above drawing is the switch band mounting example for the D-P4DWS□ type.

Auto Switch Mounting Position and Its Height: Rod Mounting Style

Unit: mm

Auto switch model	Symbol	Auto switch set value and its height		
		ø40	ø50	ø63
D-P3DW□□	A	10.5	7	7
	B	23.5	30	30
	Hs	43.5	49.5	56.5
D-P4DW□□	A	8	4.5	4.5
	B	20.5	27.5	27.5
	Hs	45.5	51	58.5
D-P79WSE D-P74□	A	5.5	0	0
	B	27.5	26	26
	Hs	46	51	58

Note 1) The mounting position should be referred for reference only for the auto switch mounting position at the stroke end detection. Adjust the auto switch after confirming the operation to set actually.

Note 2) A/B dimensions are the distance from the standard position (above drawing) to the end surface of the auto switch.

Note 3) The auto switch mounting position is temporarily set at the time of shipping from our factory. Change it to the desired position in accordance with your facility.

Auto Switch Mounting Position and Its Height: Band Mounting Style / D-P4DW□□ Type

Unit: mm

Auto switch model	Symbol	Auto switch set value and its height		
		ø40	ø50	ø63
D-P4DW□□	A	8	4.5	4.5
	B	20.5	27.5	27.5
	Hs	43	48	55
	Ht	46	51.5	58.5
	θ	45°	36°	33°

Note 1) The mounting position should be referred for reference only for the auto switch mounting position at the stroke end detection. Adjust the auto switch after confirming the operation to set actually.

Note 2) A/B dimensions are the distance from the standard position (above drawing) to the end surface of the auto switch.

Note 3) As for D-P4DW□□ type, band mounting style, the switch mounting bracket and the auto switch have to be ordered separately. For details, refer to page 1323.

Minimum Stroke for Auto Switch Mounting

Unit: mm

Auto switch model	1 pc.	2 pcs.	
		Different surfaces	Same surface
D-P3DW□□	15	30	75
D-P4DW□□	50	50	
D-P79WSE			
D-P74□			

Note) When mounting 2 pcs. of D-P3DW□□ to the 50 mm stroke cylinder, mount the switches on different surfaces.

Operating Range

Unit: mm

Auto switch model		Bore size		
		40	50	63
D-P3DW□□	Rod mounting	4	5	6
D-P4DW□□	Rod mounting	4	4	4.5
	Band mounting	5	5	5.5
D-P79WSE	Rod mounting	8	9	9.5
D-P74□				

Besides the models listed in "How to Order," the following auto switches are applicable.

* For magnetic field resistant 2-color indication solid state auto switches, auto switches with pre-wired connector (D-P4DW□DPC type) are also available. Refer to pages 1784 and 1785.

4	CK□1□40, 50, 63 Series / With Cushion on Both Ends	Symbol -X1515
----------	---	--------------------------------

Clamp cylinder with cushion on both ends (with cushion on clamped / unclamped side)

 Caution

The air cushion is integrated in the unclamped side (head end) only for the standard type CK1 / CKG1 / CKP1 series, bore size 40, 50 and 63. When an air cushion is required on both ends, it is available as a made-to-order -X1515.

Basic type	CK1	Enter the standard model no.	-	X1515
Built-in standard magnet type with magnetic field resistant auto switch	CKG1	Enter the standard model no.	-	X1515
Built-in strong magnet type with magnetic field resistant auto switch	CKP1	Enter the standard model no.	-	X1515

With cushion on both ends ●

The specifications and the dimensions other than the cushion are the same as the standard products.
For the respective specifications and the dimensions, please refer to pages 1319 to 1322 for the CKG1/CKP1 series, and pages 1323 to 1326 for the CK1 series.

Series CK□1

Specific Product Precautions 1

Be sure to read before handling.

Refer to front matters 42 and 43 for Safety Instructions and pages 3 to 11 for Actuator and Auto Switch Precautions.

Cushion/Speed Controller Adjustment

⚠ Danger

1. Do not remove the retaining ring that fixes the speed controller valve and cushion valve. It is also unsafe to remove it once and then reattach it.

Without the retaining ring, the valve may be ejected when air pressure is supplied causing a serious hazard.

Even if it is reattached, there remains the possibility that it may be unsecured, resulting in danger.

Cushion Adjustment

The CK1 series has an integrated air cushion in the head end. The cushion is pre-adjusted at the time of shipping. However, please re-adjust the cushion valve in the tube cover, depending on an operating speed and a load before use. The diameter of throttle will be smaller when the cushion valve is turned clockwise, resulting in stronger cushion reaction.

Shown below is the fully open state, although the cushion valve can rotate 360 degrees.

The adjustment range is about 225 degrees from the fully open state. The range between 225 and 360 degrees is the fully closed state.

Speed Controller Adjustment

The CK1 series integrates the speed controller (exhaust restrictor) in the rod and head end. The cushion is pre-adjusted at the time of shipping. However, please re-adjust the speed controller valve (marked "S" on the rod cover) in each cover, depending on an operating speed and load before using.

If the speed controller valve is open all the way (max. speed position), rotating it in either direction—to the right or to the left—will cause a reduction in speed. Please note that the speed controller valve can be rotated to the right or left any number of times. However, the adjustment range is limited, and 180 degrees from the max. speed position (directly opposite) is the min. speed position.

Note 1) The figure shows the max. speed position when piping to the upper or right-side port (viewed from the front side of the rod cover).

Note 2) When piping to the left-side port, the max. speed position will be at the same angle, but on the opposite side.

Series CK□1

Specific Product Precautions 2

Be sure to read before handling.

Refer to front matters 42 and 43 for Safety Instructions and pages 3 to 11 for Actuator and Auto Switch Precautions.

Piping Port / Switch Mounting Rod Location Change

Piping Port Location Change

Piping is possible from 3 directions. When the piping port location is changed, carefully follow the instructions as detailed below.

Warning

1. Do not leave out the component parts when the piping port location is changed.
Even if one of the component parts is not replaced, malfunction may occur, resulting in dangerous operation.
2. To prevent air leakage, re-wind the pipe tape and fit into the changed location when the piping port location is changed.

Switch Mounting Rod Location Change

The switch mounting rod is mountable in 3-way directions. Please be careful to the following things when the switch mounting rod is changed.

Warning

1. Mount all the component parts to the changed location.
Even if one of the component parts is kept away, the switch detection error, etc may occur. (Switch mounting rod, Spacer with switch, Hexagon socket head button bolt)
2. After the switch mounting rod location is changed, please be sure to check there is no interference with other parts before using.

Series CK□1

Specific Product Precautions 3

Be sure to read before handling.

Refer to front matters 42 and 43 for Safety Instructions and pages 3 to 11 for Actuator and Auto Switch Precautions.

Handling

Magnetic field resistant auto switches D-P79WSE/D-P74□ type are specifically for use with magnetic field resistant cylinders and are not compatible with general auto switches or cylinders. Magnetic field resistant cylinders are labeled as follows.

Magnetic field resistant cylinder with built-in magnet
(For use with auto switch D-P7 type)

Mounting

1. The minimum stroke for mounting magnetic field resistant auto switches is 50 mm.
2. In order to fully use the capacity of magnetic field resistant auto switches, strictly observe the following precautions.
 - 1) Do not allow the magnetic field to occur when the cylinder piston is moving.
 - 2) When a welding cable or welding gun electrodes are near the cylinder, change the auto switch position to fall within the operational ranges shown in the graphs on page 1340, or move the welding cable away from the cylinder.
 - 3) Cannot be used in an environment where welding cables surround the cylinder.
 - 4) Please consult with SMC when a welding cable and welding gun electrodes (something energized with secondary current) are near multiple switches.
3. In an environment where spatter directly hits the lead wire, cover the lead wire with protective tubing. Use protective tubing with a bore size of $\varnothing 8$ or more that has excellent heat resistance and flexibility.
4. Be careful not to drop objects, make dents, or apply excessive impact force when handling.
5. When operating two or more parallel and closely positioned cylinders with magnetic field resistant auto switches, separate the auto switches from other cylinder tubes by an additional 30 mm or more.
6. Avoid wiring in a manner in which repeated bending stress or tension is applied to lead wires.
7. Please consult with SMC regarding use in an environment with constant water and coolant splashing.
8. Please be careful of the mounting direction of the magnetic field resistant auto switch D-P79WSE type.

Be sure to face the molded surface with soft-resin to the switch mounting bracket side for mounting.
(Please refer to page 1329 for mounting example and page 1804 for soft-resin mold surface.)

Wiring/Current and Voltage

1. Always connect the auto switch to the power supply after the load has been connected.
2. Series connection
When auto switches are connected in series as shown below:

Note that the voltage drop due to the internal resistance of the LED increases.
