

SPECIFICATIONS

- Max. Flow: 5.4 scfm
- Max. Pressure: 30 psi
- Motor: Permanent Split Capacitor
- Voltage: 115 volt, 60 Hz, 1-phase
- Inlet / Discharge: 1/4" NPT

FEATURES

- Oil-less, non-lube piston and cylinder
- Permanently lubricated bearings
- Stainless steel valves
- Lightweight die cast aluminum components
- Long-life, high performance piston seal
- Head design allows easy piston seal replacement
- Thin wall, hard-coated aluminum cylinder for maximum heat transfer
- Twin fans provide cooling air through and around motor and cylinders
- Power cord and fan guards are standard
- Dual intake/exhaust manifold for easy piping
- Balanced for smooth, low vibration operation
- Field service capability
- Inlet filter standard
- Capacitor
- All wetted aluminum parts treated for corrosion protection from moisture
- Patented one piece head reduces leak paths
- UL Recognized motor and thermal protector
